Dickenson Co.	Russell Co.	Wise Co.
Galax City	Scott Co.	
Grayson Co.	Smyth Co.	

President of the State Board of Education, Anne Dobie Peebles (Ex officio)

Ninety-Ninth Annual Report of the Superintendent of Public Instruction, 1968-69

INTRODUCTION

In 1970 Virginia will observe the centennial year of the establishment of the State's public school system. As we approach the 100th anniversary of public education in the Commonwealth, it is fitting that we honor those men and women who have given unselfishly of their time and talents in striving for educational programs to meet the needs of Virginia's youth and adults.

Virginia approached the end of the first century of a State system of public education with 1,088,913 pupils enrolled in the public schools and 51,240 teachers and other instructional personnel. The salary for public school teachers during 1968-69 averaged \$7,328 and for all instructional personnel \$7,576.

The holding power of the public schools continued to improve during 1968-69; the percentage of dropouts in high school grades was the lowest since the Department of Education began keeping statistics in 1961; 92.6 percent of the public school teachers held certificates based on college degrees; special education services were expanded; vocational education programs continued to grow in response to the needs of business and industry.

ELEMENTARY ACCREDITATION STANDARDS

A committee appointed in 1967 by the Superintendent of Public Instruction completed work on developing the State's first accreditation program for elementary schools. During the year tentative proposals by the committee were distributed to school superintendents and were used as a basis for discussion at conferences sponsored by the Department for elementary school principals.

The committee's proposals, which were scheduled to be presented to the State Board of Education in September, included standards governing administration and organization, qualifications of school personnel, equipment and materials for instruction, buildings and grounds, instruction and services, pupil-teacher ratio, special education, kindergarten programs, guidance services, library facilities and personnel, safety, classroom instruction, and opportunities for varied learning experiences.

The development of a program for accrediting elementary schools was initiated by the State Board as a major step in its efforts to upgrade the quality of public education in Virginia, and is one of the most significant steps ever taken in elementary education in the State.

REVISION OF ACCREDITATION STANDARDS FOR SECONDARY SCHOOLS

A committee of 17 educators appointed to revise the accreditation standards for secondary schools had completed their study at the end of the fiscal year. The proposed revisions were discussed at regional meetings with school administrators and principals in preparation for presentation to the State Board in August. The standards for junior and senior high schools were last revised in 1960.

REVISED STANDARDS FOR TEACHER CERTIFICATION

Revised standards for the certification of public school teachers in Virginia became effective July 1, 1968, marking the first major revisions in certification regulations since 1960. The new standards include the following:

- The Collegiate Professional Certificate is issued initially for a period of five years from the date of qualification and is renewable for five years. (Requirements for the Graduate Professional Certificate are unchanged.)
- Revised general education qualifications require that all applicants hold a baccalaureate degree with a background of 48 semester hours in general education, including at least 12 semester hours each in the humanities, social science, and laboratory science and mathematics, and four hours of health and physical education. The remaining eight hours must be distributed among the humanities, social sciences, and laboratory science and mathematics. (The revisions also recommend a course in speech and in basic economics as a part of the general education requirements for all teachers.)
- Not less than 120 clock hours of student teaching are required, with a minimum of at least 90 of these hours in actual teaching.
- For an endorsement in elementary education (grades 1-7), the applicant must complete a total of 60 semester hours in specific subjects, including a course in American history and a course in basic economics.
- The number of semester hours was increased to qualify for endorsement in art, distributive education, driver education, English,

English and speech, English and journalism, English and dramatics, foreign languages, health and physical education, history and social science, mathematics, music, science, and special education. Applicants for endorsement in history, geography, or sociology are required to complete a course in basic economics.

- A new Industrial Education Certificate, based in part on college-credit courses, is available to qualified applicants in vocational industrial education.

SYSTEMWIDE EVALUATION AND PLANNING

One of the major developments during the year was the inauguration of an evaluation and planning program designed to upgrade the quality of education in the public schools. The program is supervised by a Special Assistant for Evaluation and Planning in the Department who works cooperatively with local school officials and members of their staffs in reviewing and evaluating school programs. The program was begun with 19 school divisions and will be extended to other school divisions throughout the State.

The evaluation and planning program calls for systemwide studies which cover community background, educational programs, staff and in-service education, teaching aids and materials, school plants, and transportation. Participating in the project are personnel from the local school divisions, the Department, and colleges, as well as consultants. An evaluation instrument was developed by the Department to be used in the program.

CITIZENSHIP EDUCATION

A major objective of public education in Virginia is to instill in youth a firm commitment to the democratic heritage and to provide them with an understanding of individual rights and responsibilities in a free society. Citizenship education is designed to prepare each student for his role as a participant in the democratic process, and to instruct him in the basic principles and traditions which have sustained the American way of life.

A comprehensive program to place greater emphasis on citizenship education in Virginia's public schools was adopted by the State Board in July 1968. A Professional Committee on Citizenship Education was appointed to assemble data, prepare materials, and recommend curricula for added instructional emphasis on citizenship responsibilities. A second committee, composed of persons not directly associated with

public schools or colleges, was appointed to serve in an advisory capacity in planning an expanded program of citizenship education.

Pilot projects developed by the Committee on Citizenship Education are planned in several school divisions.

KINDERGARTEN EDUCATION

For the first time in Virginia's history State funds were used to assist localities operating kindergarten programs as a part of their regular school systems during 1968-70. Approximately 23,300 children were enrolled in kindergarten programs in 21 localities which received State aid in 1968-69.

Prior to the start of the kindergarten program in Virginia, the State Board adopted certification standards for kindergarten teachers, established regulations for the length of the school day and the size of classrooms, and recommended that the pupil-teacher ratio should not exceed 25 pupils.

DRIVER EDUCATION

The State Department of Education is intensifying efforts to assist the public schools in training the growing ranks of eligible drivers. Action by the General Assembly and modern techniques of driver instruction are significant factors in the accelerated program. Driver education includes classroom instruction, simulated driving, single-car instruction, and experience on a multiple-car driving range.

The 1968 General Assembly took action which became effective July 1, 1968, requiring that a Driver Education Certificate must be a prerequisite for obtaining a Virginia Operator's License before the age of 18. The Department of Education has cooperated with the Department of Motor Vehicles in developing an evaluative system for the certificate.

The Federal Highway Safety Act of 1966 provides funds on a 50-50 matching basis to expand driver education programs. Much of the State's 1968-69 allocation was used to reimburse localities with special projects for expanding or upgrading driving instruction.

*Is 62.0% when 2,594 summer school graduates are included.

†Does not include 2,594 summer school graduates.

DIVISION OF ELEMENTARY AND SPECIAL EDUCATION

ELEMENTARY EDUCATION

Purpose and Scope

The major function of the Elementary Education Service is to provide leadership for the improvement of elementary education in Virginia in keeping with the law and established policies of the State Board of Education. A related function is that of assisting in improving the services of supervisory personnel and elementary school principals. Elementary Education Service personnel continually study all phases of elementary education in the State, help determine progress made in school divisions, identify problems in elementary education, and provide leadership and assistance in the development of the elementary school curriculum and in the preparation of curriculum materials for local school use.

The Elementary Education Service staff serves, directly or indirectly, all school personnel concerned with elementary education. In 1968-69 these included 122 elementary supervisors, 55 general supervisors, and 76 directors of instruction employed with State aid in 79 counties and 26 cities; 1,312 principals of elementary schools, 98 principals in combined elementary and junior high schools, 131 principals in combined elementary and high schools; and 28,735* classroom teachers in schools enrolling 708,212* pupils.

Accomplishments

Conferences. A Statewide conference for supervisory personnel, which emphasized the teaching-learning theme, was held during the year. Major features of the conference included addresses by outstanding educators, and panel and group discussions focused on recent developments in patterns of learning and factors influencing teaching-learning. The annual conference of elementary school principals emphasized the role of the elementary principal in education. Addresses were given by outstanding educators. A report of tentative standards for the accreditation of elementary schools was reviewed and comments and recommendations for changes were received.

Members of the Elementary Education Service staff attended and participated in other conferences sponsored by the Virginia Education Association, the Southern Association of Colleges and Schools, the Association for Supervision and Curriculum Development, the National Science Teachers Association, the National Council for Teachers of Mathematics, the Southern States Work Conference, the International Reading Association, the Department of Elementary School Principals, the National Council of State Consultants in Elementary Education, the Association for Childhood Educational International, and the National Council for the Social Studies.

Curriculum Development. The Elementary Education Service staff prepared a curriculum guide entitled *Elementary Mathematics Guide, K-7* for distribution to 28,000 teachers, principals, and supervisors. Members of the Elementary Education Service staff held a series of 10 regional mathematics conferences involving approximately 2,225 classroom teachers, elementary principals, and supervisors

*Superintendents Annual Reports submitted July 15, 1969.

in discussions as to how the guide could be used in improving mathematics instruction in elementary schools.

Field Work. Staff members made a total of 2,122 classroom visits, worked in 74 counties and 27 cities, and participated in local workshops and conferences, met with superintendents, principals, supervisors, and worked with Parent-Teacher Associations. Staff members made 25 visits to regional meetings of supervisors, and seven visits to regional meetings of elementary school principals.

Staff. In providing leadership for elementary education, the Elementary Education Service employed for the first time a specialist in elementary science. An elementary mathematics specialist was employed for the first time in 1967-68. It is anticipated that specialists in other content areas will be added to the staff as positions become available.

The Cooperative Program in Elementary Education of the Southern Association of Colleges and Schools. School systems in states served by the Southern Association of Colleges and Schools may participate in an elementary school improvement program by becoming members of the Cooperative Program in Elementary Education. Since 1960-61, two options have been available to members in the Cooperative Program: (1) affiliated membership with a continuous program of school improvement conducted in each school, and (2) membership through accreditation. Affiliated membership of at least one year must precede application for membership through accreditation.

Virginia has a State Elementary Committee which is responsible for giving leadership in the State to the Southern Association's program of affiliation and accreditation of elementary schools. Members of the State Committee serve on the Association's Commission on Elementary Schools.

During 1968-69, 463 elementary schools held affiliated membership in the Cooperative Program in Elementary Education. Seventeen city school divisions and 12 county divisions held division-wide affiliated membership. Also participating in the program were eight individual public schools, five private and six military reservation schools.

The Cooperative Program in Elementary Education has accredited 138 elementary schools since 1964. Ninety-nine of these were in Fairfax County, 33 in Richmond City, three in York County, and three at the Quantico Marine Base. Elementary schools in Buena Vista, Radford, Roanoke, and Waynesboro cities and in Prince William, Washington, and York counties were engaged in self-studies and were visited by representatives of the Southern Association of Colleges and Schools.

Title III, National Defense Education Act. During 1968-69 staff members reviewed applications providing for the purchases of materials and equipment with funds available from Title III of the National Defense Education Act.

SPECIAL EDUCATION SERVICE

Overview

The primary responsibility of the Special Education Service is to provide consultation, leadership, and direction to local school divisions in initiating, expanding, and improving programs and services for exceptional children, and to disburse State special education funds in accordance with the rules and regulations established by the State Board of Education.

Exceptional children are defined as children whose educational needs differ from those of other children to such an extent that they require a differentiated or specialized program in order for them to develop to their maximum potential. Generally, these children have physical, mental, speech, hearing, visual, or neurological handicaps, or a combination of these conditions. Included are children who need to be hospitalized as well as those whose handicaps cause them to be homebound.

The gifted child, who has the capacity for superior achievement in some area of human endeavor, is also identified as an exceptional child requiring special education to develop the use of his unique potential.

During 1968-69, 1,283 special education teachers were employed to serve 35,750 handicapped children in Virginia's public schools. These figures reflect an increase of 210 teachers and 3,625 children when compared with the preceding year. Increased State, local, and federal appropriations have made this growth possible. Enlarged teacher education programs and continuing improvements of diagnostic procedures and teaching programs will contribute to a refinement of services to these children.

While Virginia's total program of special education has grown steadily, its services are not spread evenly over the State. Population density, geography, financial ability, and public concern vary to such an extent that some areas of the State provide sophisticated, comprehensive programs while others have no special education program. During the past school year, however, many of the smaller school divisions were encouraged to cooperate with each other and develop regional programs to meet the educational needs of their exceptional children. The growth in educational programs and improved services for handicapped children which were developed in Virginia during 1968-69 required increased consultative assistance from members of the staff of the Special Education Service.

The following charts illustrate the growth in special education programs during the past six years. While the greatest expansion was in classes for the mentally retarded, programs in other areas also were enlarged.

NUMBER OF CLASSES AND TEACHERS

	1963-64	1964-65	1965-66	1966-67	1967-68	1968-69

Description of Programs

Instruction for the Physically Handicapped. Children with physical handicaps are encouraged to attend regular classes whenever possible. This can be accomplished by a slight modification of physical facilities to aid the child's movement in the school. Some divisions have found it desirable, however, to operate schools that are especially designed and equipped for children with crippling conditions.

Homebound Instruction. This program is designed to meet the educational needs of children confined either temporarily or permanently to their homes because of illness, accident, or congenital deformity.

Blind and Partially Sighted Children. Through the utilization of federal funds and in cooperation with the Virginia Commission for the Visually Handicapped, the Special Education Service provided apparatus, and Braille, and/or large print books for 596 children who were blind or partially sighted.

Children with Speech and Hearing Impairments. Special programs for children with defective speech were available in 41 school divisions served by 172 speech specialists and six speech supervisors.

The number of speech specialists in a school division determined the number of schools served. Priority was given to primary and elementary service.

Depending on individual situations, either the block system or the intermittent system was used. An average number of nine classes was scheduled a day. Usually there were four children in a group for 30 minutes each session. Available space in the schools was used for "therapy rooms." Therapy material was furnished by the school division.

In 73 school divisions where hearing tests were administered by audiometric technicians, speech therapists, and other trained persons, 186,853 children were tested; 8,411 children were found to have significant hearing impairments, and 3,702 children received medical follow-up for corrective purposes.

Emotionally Disturbed. These are children who, because of emotional or organic difficulties, are too distraught to adjust successfully to regular classroom environment.

In addition to instruction provided in treatment centers and homes, 46 special classes were held for 501 children in Chesterfield, Fairfax, Henrico, and Orange counties and in the cities of Charlottesville, Norfolk, Richmond, and Roanoke.

In some instances resource teachers were provided so that emotionally disturbed children could attend regular classrooms.

Neurologically Impaired. Twenty-three classes in nine school divisions provided services to children classified as being neurologically impaired. These are children who manifest severe learning problems usually accompanied by evidence of impairment of the central nervous system.

Children with Retarded Mental Development. An increasing number of school divisions are providing programs for mentally retarded children. A total of 13,493 mentally retarded children were enrolled in 951 special classes in 71 counties

and 31 cities throughout the State. The following statistics contrast the scope of the program in 1967-68 and 1968-69:

<i>Classification</i>	<i>Children</i>		<i>Classes</i>	
	67-68	68-69	67-68	68-69
Severely retarded (trainable).....	1,465	1,741	111	142
Moderately retarded (educable).....	10,043	11,752	699	809
	<hr/> 11,508	<hr/> 13,493	<hr/> 810	<hr/> 951

Instruction of Children in Hospitals. Thirty-five hospital teachers were paid from State and federal funds to teach 2,306 children and youths in 14 hospitals, rehabilitation centers, and sanatoria as follows:

<i>Hospitals</i>	<i>Number of Persons Taught</i>	<i>Number of Teachers</i>
Crippled Children's Hospital, Richmond.....	334	4
E. G. Williams Hospital, Richmond.....	159	2
Medical College of Virginia Hospital, Richmond.....	33	1

	<hr/> 2,306	<hr/> 35

School Psychological Services. Reimbursement was made to localities for psychological evaluations of 2,209 children found eligible for placement in special education classes. In addition, localities received partial reimbursement on the salaries of 52 full-time school psychologists employed in 17 school divisions.

Visiting Teacher Services

During 1968-69, 216 persons were employed as visiting teachers in 85 school divisions throughout the State. Reimbursement from State funds was made for 89 positions and 127 positions were financed entirely by local divisions or by federal projects.

In addition to persons employed as visiting teachers, an increasing number of home-school coordinators who, to all intents and purposes, are serving as

visiting teachers in target areas were employed in accordance with provisions of Title I of Public Law 89-10. In many instances, these coordinators work under the direct supervision of a visiting teacher, a coordinator of visiting teachers, a supervisor of visiting teachers, or a director of pupil personnel services whose responsibilities include ancillary personnel of various disciplines.

With the assistance of special funds, the Special Education Service during 1968-69 utilized the services of a consultant on a per diem basis to lead two-day workshops on matters of professional concern for all visiting teachers in the State. In addition, the consultant developed a pilot project with a rural community of limited resources which had employed a visiting teacher with limited experience and minimal training. The objective of the experiment was to determine if an inexperienced visiting teacher working alone in a school division with limited resources (educational and community) would benefit from the opportunity to consult with a highly trained professional once every two weeks. A brief report from the visiting teacher and from the consultant on the success of this pilot study is available.

The following statistical information was compiled from annual reports submitted by visiting teachers to the Special Education Service:

REFERRALS TO VISITING TEACHERS

40,712 new referrals for the current year

13,487 referrals carried over from the previous year

<i>Reason for Referral</i>	<i>Boys</i>	<i>Girls</i>
Child-Centered Problem.....	6,839	3,965
Home-Centered Problem.....	6,749	5,641
School-Centered Problem.....	3,952	2,437
Attendance Problem.....	10,479	8,023
Health Problem.....	2,989	3,046
		Total—54,120*

Analysis of visiting teachers' annual reports indicates that the basic causes for referrals were the following.

<i>Basic Causes</i>	<i>Frequency</i>
Child-Centered Problem.....	12,417
Home-Centered Problem.....	17,888
School-Centered Problem.....	6,811
Attendance Problem.....	13,877
Health Problem.....	6,239
Total.....	57,232*

Activities of Members of the Special Education Staff

During 1968-69, one supervisor and six assistant supervisors in the Special Education Service made 274 visits to local school divisions; participated in 288 conferences and staff meetings; and attended or conducted 221 State, local, and national conferences and workshops.

The staff gave leadership to the establishment of new special education programs in the State and to the improvement of existing programs. The Special

*The discrepancy in statistics is due to the fact that several factors may be involved in causes of problems, whereas a referral will generally state only a single problem.

Education Service received 28 applications for utilizing Title VI-A funds involving 45 school divisions. Twenty-three of these applications, involving 37 school divisions, were awarded funds requiring the expenditure of approximately \$320,000. Additional Title VI-A funds were used in teacher-training programs. These included: extension courses, tuition reimbursement, and summer session traineeships. The utilization of Title VI-A administrative funds included: salary of the Title VI-A coordinator, office furniture, travel and incidental expenses connected with the position; expenses of the Title VI-A Advisory Committee; expenses of the State Committee for the Hearing Impaired; and expenses of a consultant and a training program conducted for visiting teachers.

The staff also determined eligibility and awarded fellowships and traineeships under funds provided by Public Law 85-926, as amended, and conducted workshops and institutes for hospital teachers, speech therapists, visiting teachers, and teachers of emotionally disturbed children.

Special Education Service personnel evaluated credentials of applicants for positions as school psychologists and visiting teachers in various school divisions; evaluated applications for financial assistance for the education of handicapped children classified as severely handicapped and/or aphasic, and disbursed to localities State aid totaling \$4,151,270 for services to exceptional children.

THE VIRGINIA SCHOOL FOR THE DEAF AND THE BLIND, STAUNTON

The School completed its 130th session in June, 1969. Two deaf graduates qualified for Gallaudet College, and four blind students have been accepted by colleges. Many of the graduates secured jobs shortly after graduation while others are continuing their education in business colleges and vocational schools.

A new dormitory for 64 deaf boys between the ages of six and 12 was occupied on January 6, 1969.

During the session, the School sponsored a number of professional workshops and teachers attended conferences and workshops in other states.

The Department for the Deaf made a self-survey and is working toward accreditation in 1969-70. Efforts are being made to improve services in every department of the School.

VIRGINIA SCHOOL AT HAMPTON

At the 1906 session of the General Assembly, legislation established the Virginia School at Hampton for the education of deaf and blind children. The

objectives of education at the School include the development of self-realization, proper human relationships, economic self-sufficiency, and civic responsibility.

The School consists of two Departments, the Department for the Deaf and the Department for the Blind. Vocational training is offered in both. The high school is accredited by the State Board of Education and graduates of the two Departments are eligible for advanced educational opportunities.

DIVISION OF SECONDARY EDUCATION

The Division of Secondary Education supplies leadership and assistance in matters concerning secondary education in the public schools of Virginia. The staff of the Division provides supervisory and administrative services to local school divisions and assists them in developing and maintaining quality education in Virginia's high schools.

Division personnel are primarily concerned with improving instruction in academic subjects, the fine arts, health and physical education, driver education, and adult education. The work of the Division is carried out through 10 different services: Adult Education; Art; Driver Education; English; Foreign Languages; Health and Physical Education, Safety, and Recreation; History, Government and Geography; Mathematics; Music; and Science. The Division also is responsible for approving and supervising projects conducted under Title III of the National Defense Education Act (NDEA).

Staff members work with local school divisions to achieve specific objectives. These include: interpreting the policies of the State Board of Education; providing leadership in the development of the curriculum and the improvement of instruction; giving impetus to the continuous evaluation of secondary education; serving as a resource agency to assist in the study of specific local problems; providing consultative services; assisting in accreditation and licensing procedures; and working with professional personnel at every level of education in an effort to improve secondary education in Virginia.

Supervisors and their assistants in each service perform a number of important duties such as serving on evaluation committees, participating in State-wide conferences, arranging in-service opportunities for teachers, conducting surveys, addressing civic and educational groups, assisting in the development of library facilities, participating in regional and national efforts devoted to curriculum improvement, and conferring with representatives of school divisions throughout the State.

Reports were received during 1968-69 from 490 public high schools and 68 private high schools.

In addition to the overall activities performed by the Division staff to promote the improvement of secondary education, accomplishments during the year included the following:

SUPERVISORY AND ADMINISTRATIVE RESPONSIBILITIES

Accreditation of High Schools. Accreditation standards are designed as guidelines for secondary schools in the continuing effort to provide a spectrum of educational opportunities to meet the needs, interests, and aspirations of youth. During the 1968-69 school year, 476 public secondary schools (schools containing one or more of grades eight through 12) and 68 private secondary schools were accredited by the State Board of Education. Data processing was used to analyze the Preliminary Annual High and Junior High School Reports of all schools offering studies on the high school level.

Staff members visited six new public secondary schools that filed Preliminary Annual High or Junior High School Reports for the first time. Fifteen previously accredited public secondary schools and one private secondary school were converted, consolidated, or discontinued for the 1968-69 school session.

The proposed revised edition of the bulletin, *Standards for the Accrediting of Secondary Schools*, was submitted to the State Board of Education at its meeting in August 1969 and was subsequently approved to become effective for the 1970-71 school year. The approved new standards were the culmination of a committee of public and private school educators appointed by the State superintendent of public instruction to review, revise, and update the secondary school accreditation standards.

High Schools Closed, Consolidated, or Converted. During 1968-69 the following public and private secondary schools were closed, consolidated, or converted:

<i>Division</i>	<i>School</i>	
Culpeper County.....	George Washington Carver Regional..	Closed
Gloucester County....	T. C. Walker High School.....	Converted to Gloucester Intermediate

Private School.....	St. Patrick Central, Richmond.....	Closed

State Aid for Employment of Supervising Principals for Twelve Months. Reimbursement totaling \$886,938 was made to 95 counties, 34 cities, and five towns where 1,084 principals of elementary and secondary schools were employed on a 12-month basis. These figures represent increases over the preceding year of 40 positions and approximately \$71,000.

The program is designed to help school divisions improve the quality of administration, operation, and supervision of schools. It is credited with improving the organization and planning of the school program and promoting better supervision of summer school activities, school-community relations, and services rendered by the schools to the students and communities.

Conferences. The State Department of Education sponsored conferences, workshops, and meetings during 1968-69 for the purpose of disseminating information and discussing developments in all fields of secondary education. State-wide conferences for teachers and supervisory personnel were conducted by the following services: Art; Foreign Languages; Health and Physical Education; History, Government, and Geography; Mathematics; Music; and Science.

The Annual Conference of Secondary School Principals, which is sponsored by the Division of Secondary Education, was held on June 16-18, 1969, in Norfolk. The conference theme, "The Principalship in Transition—Strategies for Change," served as a basis for exploring the many problems being faced by today's secondary school administrators. Topics such as drug use and abuse, citizenship education, organization and administration of integrated schools, and student militancy were discussed. More than 400 principals, supervisors, superintendents, and other school personnel registered for the three-day conference.

The staff members of the Division of Secondary Education also participated in numerous pre-school and mid-term conferences, meetings, and study groups which were sponsored by local school divisions or by district and regional groups.

Southern Association of Colleges and Schools. The primary function of the Association is to stimulate and improve education through voluntary accreditation of secondary schools in 11 southern states. The Association's Commission on Secondary Schools recognizes quality education programs in secondary schools by granting membership based on the organization's self-imposed standards.

A total of 232 public and private secondary schools in Virginia hold membership in the Association. Twenty-three schools were accredited for the first time at the annual meeting in Atlanta, Ga., in November 1968 and six schools were discontinued or dropped from membership.

Leadership for member schools in the State is provided by the Virginia Committee which is composed of eight members and 10 associate members representing all geographic areas of the State. Operating within the Commission to carry out the Association's policies, the members of the Virginia Committee seek to encourage and stimulate progress in member schools, promote conditions which will enable member schools to meet the requirements of the Association, and to assist non-member schools in their efforts to obtain membership.

The supervisor of secondary education serves as executive secretary of the Virginia Committee.

Secondary School Evaluation. The program of high school evaluation which is sponsored and organized by the State Department of Education continues to grow. The program is designed to provide opportunities for faculty members to

participate in an organized effort to improve and expand educational opportunities and programs for children. The program also provides opportunities for visiting committee members to gain valuable in-service experiences as they assist schools in their evaluations.

Staff members of the Division of Secondary Education gave assistance and guidance to self-evaluation programs conducted in 31 public secondary schools during 1968-69. Teams of educators, including local administrative and supervisory personnel, classroom teachers, and personnel from colleges and the State Department of Education, reviewed the progress made by each school and gave written appraisals of their programs.

The following secondary schools completed self-evaluations and were evaluated by visiting committees during 1968-69: Albemarle County—Albemarle High School; Alexandria City—T. C. Williams High School; Bedford County—Liberty High School; Buena Vista City—Parry McCluer High School; Chesapeake City—Deep Creek High School, Great Bridge High School, Indian River High School; Chesterfield County—Matoaca High School, Meadowbrook High School; Fairfax County—Fairfax High School, Langley High School, McLean High School, Joyee Kilmer Intermediate School; Montgomery County—Blacksburg High School; Portsmouth City—Alf J. Mapp Junior High School, Harry A. Hunt Junior High School, S. H. Clarke Junior High School, W. E. Waters Junior High School; Prince William County—Brentsville District High School, Stonewall Jackson High School, Woodbridge High School, F. M. Lynn Junior High School, Graham Park Junior High School, Jennie Dean Junior High School, Marsteller Junior High School, Parkside Junior High School, Rippon Junior High School; Southampton County—Southampton High School; Tazewell County—Pocahontas High School; Virginia Beach City—Frank Cox High School; Wise County—Coeburn High School.

Title III, National Defense Education Act of 1958. The National Defense Education Act was enacted in 1958 to strengthen instruction in specific subject areas. Through matching grants, Title III of the NDEA provides for the purchase of specified types of equipment and materials and for State administration of the NDEA program.

During 1968-69 Title III funds were used in Virginia to strengthen science, mathematics, modern foreign languages, history, civics, geography, English, reading, and industrial arts. The State's Title III allocation for the year included \$1,949,649 for equipment and materials and \$42,701 for administration of the NDEA program at the State level.

During the year 1,507 elementary and secondary education projects from 104 school divisions were approved for a total amount of \$4,182,083. Under the matching provisions of the NDEA program, local school divisions received federal reimbursements totaling approximately \$1,779,199 for the approved projects. The sum included \$628,193 for equipment and materials for elementary schools and \$1,151,005 for secondary schools.

A separate allotment of \$11,343 was provided under Section 12 of the National Foundation on the Arts and Humanities Act of 1965, which established a program of matching grants to public schools for strengthening instruction in the arts and humanities. Under provisions of this Act, seven school divisions submitted 14 elementary and secondary projects which were approved for \$22,701. Federal reimbursements totaling \$11,314 were made upon completion of the projects.

ADULT EDUCATION

The General Adult Education Program had 21,346 adults enrolled in 1,252 classes in 36 local school divisions. State funds provided 63 percent of the cost of instructors salaries.

State funds were increased to \$120,000 for 1968-69, the first year of the biennium, and to \$150,000 for the second year. Reimbursement is made on 60 percent of the instructor's salary up to a maximum salary of \$5 per hour.

Staff members provided information about the General Educational Development Program for military and civilian personnel and scored tests given by local divisions. During the year 35,155 tests were administered by local school divisions and by the Department of Welfare and Institutions. The complete battery of five tests was taken by 5,380 persons; 4,915 persons took one or more individual tests. A total of 3,441 persons qualified for the General Educational Development Certificate.

The alien program conducted in cooperation with the U. S. Department of Justice assisted 648 aliens. Home study materials and information about naturalization procedures and educational opportunities were provided for 192 persons.

Under the authority of Title III of the Elementary and Secondary Education Act of 1966 (Public Law 89-750), Virginia offered Adult Basic Education classes in 95 school divisions. The program, which has been in existence for four years, has had a total enrollment of 22,570 persons of whom 2,573 had completed the eighth grade.

More than 6,000 adults were enrolled in the program during 1968-69. The core curriculum, consisting of language arts and computational skills form the basis of the program which is designed to offer an eighth-grade education to adults 18 years of age or older.

To provide opportunities for more adults to participate, six learning centers were established to operate on a 12-hour day providing adults with an educational facility for Adult Basic Education.

During the year 145 classes were offered in the Civil Defense Education Program for Personal and Family Survival, with 7,320 persons completing the course—an increase of 1,663 above the number who completed the course during the previous year. A total of 6,999 teachers and staff personnel from 29 school divisions completed the Personal and Family Survival.

A survey on the Warden Service and Emergency Planning for Schools showed the following:

44 school divisions established a Warden Service organization; 45 divisions required an Emergency Plan for the divisions; 47 school divisions required an Emergency Plan for each school; 41 school divisions included survival subjects in the regular course of instruction; 99 school divisions had qualified instructors for Civil Defense Education and some or all teachers in 75 school divisions had completed a course in Personal and Family Survival.

ART

Student enrollment in art education courses in Virginia totaled 66,115 in grades seven through 12 during 1968-69, compared with 52,209 the previous year. Art personnel in the State increased from 698 in 1967-68 to 812 during 1968-69.

The personnel included 577 secondary art teachers; 183 elementary art teachers; 32 combination secondary and elementary art teachers; and 20 art supervisors.

The Art Education Service assisted school divisions through consultation, observation, and evaluation. Supervisory personnel of the Art Education Service attended local, State, and regional conferences and two staff members were on the program of the national conference. The Art Education Service assisted communities and school divisions throughout the State by judging art exhibits, serving local curriculum study committees, and helping with plans for new art facilities. Members of the service participated in several art festivals throughout the State during the 1968-69 year. A joint proposal was drawn up in cooperation with the English Education Service which contained suggestions for organizing a camp of the arts to be sponsored by the State Department of Education and the Governor's Commission on the Arts and Humanities.

The Art Education Service assisted school divisions developing art or art-related projects under provisions of the Elementary and Secondary Education Act of 1965. Staff personnel served as special consultants for an art program in Dickenson, Scott, Wise, and Lee counties to create an aesthetic school environment through the help and cooperation of principals, teachers, and students; a booklet, *The Damascus Experiment*, describing an exemplary elementary art program in Washington County; and programs in Powhatan, Carroll, and Charles City counties.

The members of the Art Education Service also worked toward completion of two State curriculum guides. Work was begun on a revision of the Art guide for the high school grades. Procedures for beginning a State elementary art curriculum guide also were instituted. A committee of elementary teachers, principals, and supervisors, as well as elementary art specialists has been selected to work on the guide. A date for the first meeting has been set.

During the year a number of in-service activities were undertaken, especially for those school divisions in more remote areas of the State. One of the most innovative activities of the year took place in Prince William County during a two-day workshop focused on communication through art, music, and physical education. The workshop for teachers and administrators was organized cooperatively by the Art Education, Physical Education, and Music Education Services.

Two of the most effective in-service activities of the year were presentations of art dialogues in Newport News and Portsmouth.

The Annual Summer Art Conference was extended to two weeks, June 16- 8, and was held at Madison College. In conjunction with the conference, a workshop for 26 talented high school students was conducted and was highly successful.

The Spring Art Conference was held in Roanoke on April 25 and 26.

DRIVER EDUCATION

Virginia's school personnel are concerned with helping youth meet successfully the everyday challenges which confront them. One of the greatest problems facing youth, as well as adults, today is the increasing number of traffic crashes resulting in injuries and/or fatalities. The public schools must guarantee that every individual who wishes to drive be given opportunities to learn proper driving techniques and to develop the attitude essential to safe driving. Through legislative enactment, the State has made a commitment to the support and promotion of a secondary school driver education program for all eligible youth.

During 1968-69 34,644 students in 313 high schools completed the State-approved driver education program which was conducted in 130 school divisions. Reimbursement in State funds to localities totaled \$1,293,600. A total of 1,248 teachers taught approved driver education programs; 569 new driver-education teachers were certified during the year. Many school divisions expanded and upgraded their approved driver education programs by using driving simulators and multiple-car driving ranges. The use of simulators and multiple-car driving ranges enables school divisions to make programs available to more students at a lower per student cost.

The curriculum guide for driver education in Virginia has been revised and distributed to the administrative staffs and driver education teachers in all school divisions. The guide outlines both classroom and in-car instruction.

A brochure entitled "Driver Education In Virginia Public Schools" was published and is available upon request.

Working jointly with the Division of Motor Vehicles and the State Police, the Driver Education Service developed the Driver Education Certificate (DEC-1) which must be presented by the student to the Division of Motor Vehicles Examining Station before he is eligible to apply for an operator's license under 18 years of age. The DEC-1 is issued by the school division to the student upon successful completion of the State-approved driver education program. This is done in compliance with Section 46.1-357 of the Code of Virginia. The Driver Education Certificate will enable the Driver Education Service to evaluate driver education programs for public, private, parochial, and commercial schools throughout the State.

The driver education staff was expanded to include an assistant supervisor—a position provided for with funds received through a project approved under the Highway Safety Act of 1966. Thirty projects submitted by local school divisions to expand and upgrade driver education programs have also been approved under the Highway Safety Act of 1966.

Staff personnel attended State, regional, and national driver education conferences. The State Conference for Health, Physical Education, and Driver Education Teachers was held at Natural Bridge on March 27-29 for college and high school instructors.

Colleges preparing teachers for driver education used staff services for guidance and assistance in the development of their programs. Localities were assisted by staff members in preparing projects under the Highway Safety Act of 1966 to expand and upgrade driver education programs.

The Driver Education Service assisted driver education teachers and administrators in organizing and developing programs, improving instructional techniques, and selecting and using equipment and materials for classroom instruction and in-car instruction.

Commercial driving schools must be licensed by the Director of Professional and Occupational Registration and approved by the State Department of Education's Driver Education Service when conducting programs for anyone under 18 years of age (Section 46.1-357 of the Code of Virginia).

ENGLISH

During 1968-69 the English Education Service devoted most of its attention to working with school systems and individual schools on special concerns, such as appraisal of present programs and the development of new programs. Significant portions of time also were given to evaluation of rapidly increasing amounts of

curriculum materials and to the work connected with serving in an advisory capacity to federally-sponsored projects. In addition, more time than usual was spent this year in working with college English and education departments to improve articulation between them and the secondary schools.

Internal office work for the year centered primarily upon the adoption of dictionaries for grades eight through 12, carrying out research for "A Study of English Offerings in Virginia Colleges," and the completion of *A Curriculum Bulletin in English for Low-Achieving Pupils, Grades 8-12*. Considerable time and effort also were given to the review of supplementary books and materials for inclusion on the lists developed by the Libraries and Textbook Service and the Bureau of Teaching Materials.

Members of the English Education Service worked with related professional organizations in various capacities. Serving on the Board of Directors and on several committees of the National Council of Teachers of English, the staff participated in planning for the Council's annual convention to which Virginia will be a host state in 1969. Other responsibilities included serving as a program participant for the Conference on English Education; assisting with the program of the Spring Conference on Elementary English held in Philadelphia; serving on the Executive Board of District "Q" of the Virginia Education Association; serving as President of the Virginia Association of Teachers of English; visiting the three NDEA Institutes in English held at Virginia institutions of higher learning in 1968; participating in the NCTE/NDEA Institute in Literature; and serving on the programs of the annual University of Virginia English Conference and Virginia Polytechnic Institute's Invitational Conference on English in the Secondary Schools.

A unique and promising aspect of the year's work was the opportunity to work with The Commission of the Arts and Humanities and other agencies in the planning of its first two projects—an Institute in Drama for Teachers of English which was held at The Barter Theatre in the summer of 1969 and a State camp for students particularly interested in drama and art to be held during the summer of 1970.

FOREIGN LANGUAGES

A significant development which occurred in foreign language learning in Virginia public schools during 1968-69 was the increased enrollment in classes in English as a Second (Foreign) Language. The classes, which were concentrated in the northern Virginia area, were composed of foreign students from many parts of the world.

Enrollment also increased in German, Russian, and Spanish but decreased appreciably in French and Latin.

Enrollments in foreign languages were as follows:

	Level I	Level II	Level III	Level IV	Level V	Level VI	Total Enroll- ment
Spanish.....	20,622	14,608	4,259	1,028	264	40,781
French.....	16,765	14,987	5,966	1,782	573	4	40,077
Latin.....	7,295	5,633	1,034	504	14	14,480
German.....	3,602	2,484	837	243	13	7,179
Russian.....	351	264	80	87	782
Portuguese.....	44	5	49

A curriculum guide for foreign languages was completed for distribution in the fall of 1969. It is the first publication produced by the State Department of Education for all foreign language teachers.

With impetus from the Foreign Languages Service, four colleges and universities sponsored a total of six summer foreign language institutes for teachers interested in contemporary methodology and general professional development.

The foreign language staff assisted teachers and instructional and administrative personnel throughout the State by offering advisory and supervisory services and by conducting workshops on the regional and divisional levels. These workshops emphasized new teaching and testing techniques in both classical and modern foreign languages.

In addition, the staff planned and conducted a two-day conference for local foreign language supervisors and coordinators; serving on visiting committees to evaluate schools and language institutes; and attended national and State professional meetings.

Approximately 550 teachers, coordinators, and administrators attended the State Conference for Foreign Language Teachers held at Virginia Beach. The theme of the conference was *motivation*—motivation for students and motivation for teachers.

HEALTH, PHYSICAL EDUCATION, SAFETY AND RECREATION

The Health and Physical Education Service provided leadership and assistance to elementary and secondary schools in the development and improvement of health education, physical education, and general safety education programs. Requests for assistance increased significantly above the number for the previous year.

The personnel of the Service assisted five school divisions in curriculum planning in health education and/or physical education. The number of in-service workshops in physical education for classroom teachers conducted by the Service increased during the year. In addition to these services, assistance was provided in the selection of materials and equipment, in the planning of outdoor activity areas, in evaluating plans for health and physical education facilities, and in the appraisal of the health-physical fitness status of pupils.

A committee was appointed in 1968 to assist the State Department of Education in the revision of the two health education guides. The revised guides are scheduled to be completed and distributed during the 1969-70 school year.

The two physical education camps were conducted at 4-H Camp Farrar at Virginia Beach provided opportunities for girls to have a camping experience, to gain a better understanding of physical education, to develop an interest in the teaching profession, and to develop leadership. Continued interest in the camp was reflected as 361 girls from 94 junior and senior high schools attended the two sessions.

The annual summary of pupils' physical defects, deficiencies, and corrections as well as their physical fitness ratings, was compiled by the Division of Educational Research and Statistics and distributed to school divisions. For the first time the summary included a separation of information for the elementary schools and for the secondary schools. School administrators and teachers were urged to use this information as they evaluated the health and physical fitness needs of their pupils and worked for continued improvement in these phases of the school program.

The annual Health, Physical Education, and Driver Education Conference was held in March 1969. The conference consisted of two meetings—one for representatives from the colleges and the other for teachers of health, physical education, and/or driver education in the public schools and colleges. The number of participants from the colleges, elementary schools and secondary schools was the largest in recent years.

Continued emphasis on upgrading physical education in the elementary schools was apparent throughout the school year. The number of special physical education teachers assigned to elementary schools almost doubled to total 516. The bulletin, *Physical Education, K-7*, was reprinted.

The health and physical education staff continued to work with the colleges. Copies of the "Content Identification Chart," which was revised by the College Study Committee on Certification Requirements for Teachers of Health and Physical Education, were sent to all colleges preparing teachers of health and physical education. A number of colleges returned the charts and had their teacher-preparation programs approved. Special committees were appointed to study (1) an endorsement in health education and (2) an endorsement in elementary physical education.

The staff reviewed family life and sex education materials and evaluated materials used and the programs being conducted in the State.

HISTORY, GOVERNMENT, AND GEOGRAPHY

Staff members of the History, Government, and Geography Education Service assist secondary school personnel in efforts to improve instruction in history and the social sciences. During 1968-69 the staff participated in curriculum analysis, selection of materials, development of new courses, and evaluation of instructional activities; conducted local in-service meetings, demonstration lessons, curriculum workshops, and pre-school conferences; and planned a Statewide conference for teachers of history and the social sciences.

Within the Department the Service cooperated with the School Libraries and Textbook Service and the Bureau of Teaching Materials in evaluating supplementary materials and assisted in the administration of National Defense Education Act, Title III, funds for instructional materials and equipment for history, civics, and geography. Staff members also developed a slide presentation on citizenship education; initiated a K-12 study on scope and sequence for history and the social sciences; prepared a statistical analysis on the status of teaching in the fields of history, government, economics, geography, sociology, psychology, and humanities; maintained a professional library which included research studies, curriculum guides, and general titles on history, government, geography, economics, and related areas; and prepared an annotated bibliography to encourage the establishment of professional libraries in social studies departments of secondary schools.

The Service planned two meetings of local supervisors of history and the social sciences and served on visiting committees in the evaluation of secondary schools.

Staff personnel prepared a bibliography on geographic education; conducted survey of curriculum development projects in local school divisions; and distributed curriculum publications to local school divisions.

Publications distributed through the Service included *A Guide to Instructional Preparation for Virginia and United States History; An Instructional Guide*

for Virginia and United States Government; *Citizenship Education as to Law, Disorder, Extremism, and Civil Disobedience*; *Curriculum Analysis in History and the Social Sciences*; *Directory of Social Studies Curriculum Projects*; *In-Service Education in History and the Social Sciences*; *Our American Heritage: Documents and Symbols of Democracy*; *Selective References for a Professional Library in History and the Social Sciences*; *The Social Studies Department*; and a *Bibliography for Geography Education*.

In addition to specific services rendered to secondary school personnel, staff members attended regional and national professional meetings related to the teaching of history, government, and geography; cooperated with various agencies and organizations such as the Senate Youth Program, Virginia State Chamber of Commerce, Model General Assembly, Virginia Federation of History, Virginia Federation of Women's Clubs; assisted lay groups interested in history, government, and economic education; assisted representatives of colleges engaged in teacher training; and participated in various studies and committees, including the Humanities Study Committee, the Advisory Committee for ETV, Executive Committee of the Virginia Council for the Social Studies, VEA Instructional Conference, Junior Historians Committee, Commission on Children and Youth.

MATHEMATICS

During the year staff members of the Mathematics Education Service worked to improve mathematics instruction by participating in local, State, and national efforts.

The staff visited school divisions throughout the State to assist in development of local curriculum guides, adoption of textbooks in mathematics, and other aspects of improvement of mathematics instruction. State personnel also planned and taught in-service mathematics classes for teachers and parents; coordinated junior and senior high school evaluations using the 1960 Evaluative Criteria; participated in computer-assisted instruction courses; judged mathematics projects at local fairs; and spoke to lay groups interested in school mathematics.

At the State level staff members planned and conducted the Sixth Annual State Mathematics Conference, held in Roanoke, and a Regional Mathematics Conference, held in Luray; helped to revise the 1965 *State Mathematics Curriculum Guide, Grades 8-12*; assisted the State Board of Education in the adoption of mathematics textbooks for 1969-75; and cooperated with Division of Special Education in developing a secondary mathematics program. They also coordinated testing activities for a State Mathematics Fair; prepared and distributed the publication, *Freshman College Mathematics Courses*; evaluated books, films, filmstrips, and other supplementary materials for the School Libraries and Textbooks Service and the Bureau of Teaching Materials; assisted the Director of Special Services in preparing recommendations for revision of textbook adoption procedures; and participated in activities of the School Mathematics Study Group as a member of its advisory board.

In addition staff members attended and/or participated in State and national meetings involving mathematics education or education in general; conducted a two-day workshop in mathematics for high school principals at the University of New Hampshire; and spoke to participants in the National Science Foundation Summer Institute at the College of William and Mary.

MUSIC EDUCATION

The Music Education Service conducted a self-evaluation of its field services during July 1968 and concluded that (1) types and extent of available services were not as widely known as they should be and (2) requests for service should be more specific in nature. As a result of the self-evaluation, an outline of the types and extent of available services was developed. Between August 15 and October 15 *every* school division in the State was visited. The outline was presented to and discussed with superintendents and supervisors, and copies were left for use by local personnel. The outline also was printed in a fall issue of *VMEA Notes*, a periodical of the Virginia Music Educators Association. Staff members believe that as a result of the wide distribution of the outline staff time in the field was more effectively used during the 1968-69 school year.

The extent of staff involvement in local long-range planning increased significantly during the year. Staff members requested extensive surveys of organizational patterns and instructional materials upon which were based both oral and written recommendations to school divisions for the development of more effective music offerings. Approximately 28 staff days were devoted to this type field service.

Again this year, local music supervisors requested that the Music Education Service sponsor a supervisors' seminar. During the two-day period staff members presented new materials and discussed problems of mutual interest with the supervisors. Several superintendents, whose divisions did not employ supervisors of music, requested that they be allowed to send observers. This seminar was one of the most successful activities sponsored by this Service during the year.

The annual State Music Conference, which the Service sponsored during mid-January, enrolled approximately 360 persons representing public schools, colleges, and private schools. In addition, nearly 500 pupils and military personnel performed during the conference.

Approximately 1,399 music teachers were employed in Virginia schools during the year, representing an increase of approximately 14.7 percent over the number for the preceding year.

The Virginia Music Camp offered opportunities for professional growth and stimulation to secondary choral teachers, instrumental teachers, elementary classroom teachers, and music teachers working at the elementary level. The enrollment this year was the largest in the 30-year history of the camp. Of the 925 registrants, 163 were teachers and 762 were pupils enrolled in one of three choruses or the orchestra. For the first time, Madison College offered both graduate and undergraduate credit to teachers for participation in the various aspects of the camp program. Approximately 2,200 persons attended one or both of the concluding concerts on Sunday, June 22.

Staff members also engaged in the following activities: (1) conducted 41 in-service workshops for teachers; (2) assisted in the development of local instructional materials in 15 divisions; (3) attended 45 national, regional, and State conferences and workshops; (4) visited, spoke to, or taught single music classes at eight colleges; (5) assisted with planning and/or evaluating 11 federally sponsored projects; (6) served as committee members for evaluating seven secondary schools; and (7) did general consultation and demonstration teaching, including special education, in 26 divisions.

SCIENCE

Enrollment in science courses in Virginia in 1968-69 totaled 303,909 students in grades seven through 12. Of this total 4,553 students were enrolled in science courses during the 1968 summer term.

The offerings in grades eight and nine continue to show a decrease in general science courses and a significant increase in specialized courses such as physical science and earth science. During 1968-69 there again was a significant increase in the number of students enrolled in the Biology BSCS—Special Materials course.

Approximately 575 teachers and administrators attended the Sixth Annual State Science Teachers Conference held in October 1968 at Fredericksburg. The Science Education Service in cooperation with the U. S. Forest Service held an Environmental Science Workshop at New Market Gap during November. Science teachers from 31 school divisions attended.

The supervisor and an assistant supervisor served as director and secretary respectively for the Council of State Science Supervisors in their evaluation of the National Aeronautics and Space Administration Spacemobile Program. During the year Science Education Service scheduled 102 Virginia schools for the NASA Spacemobile program.

The Service also selected participants for the Virginia Flight Seminar for Youth and the National Youth Science Camp in West Virginia.

The Science Curriculum Study Committee, appointed in 1967 to assist the State Department of Education in evaluating and reviewing the junior high school science program, prepared guides for life science, physical science, and earth science for local school evaluation.

A safety bulletin, "Pin Up For Safety," was prepared by staff members and distributed to local schools.

Staff members participated in several State and national science youth programs and in professional meetings and served on various committees.

The Science Education Service in cooperation with the Film Production Service produced a laboratory science safety film during the year.

DIVISION OF SPECIAL SERVICES

The Division of Special Services assists the public schools in the areas of guidance and testing, school buildings, pupil transportation, educational television, teaching materials, film production, and school libraries and textbooks. Its scope of services affects many phases of the public school program. The Division's continuing objectives are:

- To discover and promote practices and procedures which will improve instruction and guidance.
- To assist localities in planning and constructing efficient and economical school buildings.
- To aid localities in providing safe, adequate, and efficient pupil transportation systems.
- To encourage and assist localities to enrich children's learning experiences through the provision of educational television, adequate library services, and materials—including textbooks, a variety of audio-visuals, and equipment.

Reports of the 1968-69 activities of the services in the Division of Special Services follow in this order: Guidance and Testing, School Buildings, Pupil Transportation, Educational Television, Bureau of Teaching Materials, Film Production, and Libraries and Textbooks.

GUIDANCE AND TESTING SERVICE

Purpose and Scope

The Guidance and Testing Service assists local school personnel in extending and improving guidance services in the public schools of Virginia.

The activities of the Guidance and Testing Service include: visiting and consulting with local school personnel; participating in conferences; institutes, and workshops; evaluating guidance services in local schools; working with community groups and agencies interested in guidance; and developing and providing certain materials for local schools.

Guidance and testing personnel also assist school divisions in accomplishing the following objectives:

Improving the guidance and testing services and extending these services to all pupils.

Employing qualified guidance personnel to render guidance services.

Assisting each pupil in understanding himself—his strengths, limitations, interests, and needs.

Assisting each pupil in making a wise choice of his program of study and in planning for continuing education beyond high school.

Assisting pupils in making vocational choices compatible with their interests and abilities.

Assisting pupils in developing their potentialities, achieving worthwhile goals, and assuming responsibility for their decisions and actions.

Providing information to parents so that decisions made by parents and pupils will be based on a realistic understanding of the pupil's abilities, interests, and the requirements involved in his educational and vocational goals.

Providing in-service training for the professional growth of staff members.

Evaluating the outcome of guidance activities to determine their effectiveness and to discover additional ways of improving these services.

Activities and Accomplishments

During the school year, members of the Guidance Service visited school divisions in the State and worked with individuals and groups interested in guidance. The staff participated in numerous conferences and meetings, at local, State, and national levels. These included: preschool and other local conferences for teachers and counselors; district guidance meetings; meetings with counselor education classes, local directors of testing, and civic groups; annual guidance conferences of counselor education institutions; and State conferences with division superintendents, and elementary and secondary principals, supervisors, and visiting teachers.

The staff also participated in meetings and conferences sponsored by the following professional associations: Virginia Education Association, American Vocational Association, American Personnel and Guidance Association, National Vocational Guidance Association, American School Counselor Association, Virginia Personnel and Guidance Association, Southern Association for Counselor Education and Supervision, Virginia Counselor Educators, College Admissions Officers, Virginia Association of Collegiate Registrars and Admissions Officers, and the United States Office of Education.

A State-sponsored guidance institute was held in June, 1969, to help counselors improve their effectiveness in vocational guidance. The institute was made possible by an appropriation of the General Assembly which provided financial assistance to counselors attending the institute. Staff members of the Guidance Service and of the Division of Vocational Education supervised the institute, which was attended by 282 principals, counselors, vocational educators, program participants, and visitors.

By June 20, 1969, more than 2,048 counselors met or exceeded the minimum qualifications adopted by the State Board of Education. Of these, over 900 held masters degrees.

During the 1968-69 school year, guidance and testing materials were distributed to all secondary schools. These materials included one issue of *Guidance News and Views*, and materials needed in the State testing program. The bulletin, *Financial Assistance to Attend Virginia Colleges and Universities*, was revised and sent to all divisions and secondary schools in the fall of 1968.

The last two of five pilot programs in guidance in elementary schools, supported by Title V-A of the National Defense Education Act were concluded in June 1969. These five projects are being continued.† Thirty-four full-time counselors were employed in elementary schools in 12 divisions during the year. These counselors were exclusive of the number employed in some school divisions through provisions of Public Law 89-10, Title I.

Reimbursement to school divisions for guidance personnel was made through an appropriation of \$1,996,591 from the General Assembly and \$368,547 from the National Defense Education Act, Title V-A. Reimbursement was made to school divisions at the rate of 60 percent of the State Minimum Salary Scale per position for 600 counselors, an increase of 100 over the previous year. Ninety-seven counties and 32 cities received funds totaling \$2,365,138. Counselors in these positions devoted four or more class periods per day to counseling.

The Statewide Testing Program continued to place emphasis on the use of tests for improving guidance and instruction. The following tests were administered to 565,546 pupils in 1968-69:

- *Grade 1—Metropolitan Readiness Tests, Form A—
These tests involved 85,445 pupils.
- *Grade 2—Kuhlmann-Anderson Intelligence Tests, Form B—
These tests involved 66,717 pupils.
- *Grade 3—Kuhlmann-Anderson Intelligence Tests, Form CD—
These tests involved 23,707 pupils.
- Grade 4—The Lorge-Thorndike Intelligence Tests, Level 3A—
SRA Achievement Series, Form C—
These tests involved 89,029 pupils.
- Grade 7—California Tests of Mental Maturity, 1963—S Form—Level 3—
Iowa Silent Reading Tests, Form DM—
These tests involved 85,691 pupils.
- Grade 8—Differential Aptitude Tests, Battery, Form L—
These tests involved 86,254 pupils.
- Grade 9—School and College Ability Tests, Form 3A—
Sequential Tests of Educational Progress, Form 3A—
These tests involved 65,402 pupils.
- Grades 10*, 11, 12*—School and College Ability Tests, Form 2A—
Sequential Tests of Educational Progress, Form 2A—
These tests involved 63,301 pupils.

All answer sheets for grades four through twelve were machine-scored by test scoring agencies and the results were sent to the school divisions and to the Guidance and Testing Service of the Department. Tests for grades one, two, and three were scored locally and duplicate copies of class reports were sent to the Department.

SCHOOL BUILDINGS SERVICE

Purpose and Scope

The functions of the School Buildings Service are:

1. To review and approve plans and specifications for school buildings.

Section 22-152 of the Code of Virginia and regulations of the State Board of Education stipulate that the plans and specifications for all public school buildings, including additions and major alterations, shall be approved by the Superintendent of Public Instruction.

*Indicates grades in which testing was optional.

The *School Planning Manual* contains regulations governing the planning and construction of school buildings in Virginia. This manual, which is made available to local school authorities and to architects and engineers, provides the basis for the review and approval of plans by the School Buildings Service.

2. To assist local school authorities in planning functional school plants.

Members of the staff of the School Buildings Service assist local school authorities in studying building needs by analyzing proposed educational programs, population trends, enrollment patterns, and the adequacy of facilities and sites. Planning conferences are held with division superintendents, architects, and engineers. The program for each new school or addition is reviewed in terms of current trends in school offering, size, and organization.

Preliminary plans are studied to obtain the best possible relationships of instructional spaces, services, housekeeping, safety, comfort, and economy, which are consistent with the site and available funds. Final working drawings are reviewed for fire safety, planning and equipment details, construction, mechanical equipment, and adequacy of contract provisions.

3. To maintain school plant records.

Plans, specifications, and cost data are on file for all public school plants constructed in Virginia since 1948. An incomplete file is maintained for earlier schools. Drawings are being microfilmed, and prints or duplicate microfilm will be available to local school authorities.

A new school plant inventory and reporting system is being developed through the Division of Educational Research and Statistics to coordinate school plant identification for all agencies and to provide current information on school plant needs, cost, maintenance, and efficiency.

4. To suggest changes in school building regulations.

Studies are made at the suggestion of the Governor's Advisory Research Committee in an attempt to keep school building regulations up to date and in line with current educational developments. These studies involve reviews of information on building design, equipment, and construction, and on research related to school plant planning.

Activities and Accomplishments

During 1968-69, plans and specifications for 209 school construction projects were approved, as listed in the following table. Of these, 72 approvals were for prefabricated classroom units, distributed as indicated in column (PF). These units were approved for temporary use, but a few prefabricated units were approved for permanent use.

SCHOOL CONSTRUCTION PROJECT APPROVALS (1968-69) BY
TYPE OF SCHOOL ORGANIZATION*

NEW SCHOOLS				ADDITIONS, ALTERATIONS, RENOVATIONS

Staff members participated in school plant surveys; 14 visits were made to school divisions to assist with planning and construction projects.

Microfilming of plans on file was continued. The original plans, after being microfilmed, were turned over to local school authorities.

*Combined school facilities are listed as high schools, but may include elementary facilities.

†Central school facilities such as Diagnostic Center, Resource Center.

‡PF—Prefabricated units approved for temporary use.

Construction Project: A—New school (initial building on a site).

S—Prefabricated unit (relocatable) for temporary use.

B, C, etc.—Additions or alterations at an existing school.

THE UNIVERSITY OF CHICAGO

Pupil Stations: Elementary design capacity of the building project, based on 20 Kindergarten, 25 Primary, and 30 Upper Elementary Pupils per class.

School Name:

Note that many new school construction projects are approved before a permanent name has been selected. Names may therefore change, but the School plant

Identification Number is a permanent identification of the school plant.

уделенной им была 10-я Региментная артиллерия, состоявшая из 100 орудий.

PUPIL TRANSPORTATION

Purpose and Scope

The major purpose of the Pupil Transportation Service is to promote the safe transportation of pupils to and from public schools. More than 60 percent of the pupils attending public schools in the State are transported in school buses. Specifications for school buses are established to provide maximum safety for pupils, as well as economy of operation. Greater pupil safety is also provided by the careful selection and training of school bus drivers. A good transportation system must be adequate, efficient, and economical. Such a system has the following characteristics:

1. Sufficient buses of a type which will provide reasonable comfort, prevent overcrowding, and serve pupils and schools within reasonable time limits.
2. Bus routes which permit pupils to travel as directly as possible to and from school and which are planned to permit maximum use of buses, with minimum mileage and minimum waiting periods at schools.
3. The use of school buses that are properly designed, with provisions for a good preventive maintenance program and instruction of drivers in the proper care of equipment.

All school buses are inspected each year by representatives of the Pupil Transportation Service. Monthly inspections by competent mechanics also are required. This procedure is intended to insure that all buses meet requirements and that they are maintained in a safe operating condition. Whenever an inspection indicated a need for corrections, subsequent reports showed that the deficiency has been remedied.

Each year meetings with school bus drivers, mechanics and other personnel are held throughout the State to discuss many phases of pupil transportation. Requirements which must be met to qualify as a school bus driver are explained and safe transportation of pupils, observance of State Laws, regulations of the State Board of Education, local regulations, and safe-driving practices are emphasized at these meetings.

An adequate program of preventive maintenance also is stressed as a means for providing safe and economical transportation. Experience has proved the value of this program. Emphasis is placed on the importance of properly designed facilities and competent mechanics in an efficient pupil transportation program.

Plans and specifications furnished by the Pupil Transportation Service for facilities and equipment have been used by local school officials to provide many well-equipped school bus repair shops. Visits to shops, discussions of maintenance problems with mechanics, and recommendations for better methods and practices have contributed to an improved maintenance program.

Surveys of transportation systems are made upon request. Maps showing recommended bus routes are prepared, presented, and explained to local school officials. Such transportation surveys involve a careful analysis of the data obtained from the school system under study and the preparation of a spot map which show where pupils board buses. Routes are planned so that buses can operate at maximum capacity, with time and distance reduced to a minimum.

Accomplishments

Safety meetings, which were attended by school bus drivers, substitute drivers, mechanics, safety patrols, superintendents, law enforcement agents, and others connected with pupil transportation, were held in school divisions throughout the State.

New equipment—The Aetna Drivocator System—was obtained and will be used in safety meetings with school bus drivers. This equipment makes possible the use of audio-visual programs in an unique way. The programs will provide a type of classroom instruction that should contribute to the improvement of driving knowledge, attitudes, and skills.

During 1968-69 the number of buses in operation increased by 231; there was a gain of 25,566 in the number of pupils transported; and an increase of 2,563,257 in the miles traveled in transporting pupils.

From these figures, and those for the past five years given in the following table, it will be noted that the number of children transported, the number of buses operated, and the number of miles traveled continued to increase.

TABLE 9—GROWTH IN PUPIL TRANSPORTATION—1934-69

YEAR	Number Pupils Trans- ported (ADA)	Number Buses	Number Miles	Average Number Pupils Per Bus Per Day		Average Number Miles Per Bus Per Day		Cost Per Pupil	Cost Per Mile	Cost of Operation Less Gas Tax
1964-65	524,857	5,769	48,346,744	91	47	\$	22.96	\$.249	\$12,050,784.68	
1965-66	538,544	5,945	49,347,492	91	46		23.76	.259	12,796,362.84	
1966-67	555,829	6,157	50,824,192	90	46		25.93	.284	14,410,405.47	
1967-68	573,207	6,368	52,060,826	90	45		26.91	.297	15,447,463.45	
1968-69	598,773	6,599	54,624,083	91	46		29.46	.323	17,637,364.09	

During the year, some school divisions were aided in routing school buses. Assistance was given to school building survey committees, and a member of the Pupil Transportation Service served on some of these committees.

Twenty-nine school divisions lowered their per unit cost of operation and 15 divisions reduced their total net cost of operation for the year. These reductions are attributed largely to improved maintenance programs and better planned bus routes.

The number of buses, classified according to type of ownership and operation, is shown in the following table:

TABLE 10—NUMBER OF BUSES OPERATED ANNUALLY—1964-69

YEAR	Number of Publicly Owned Buses	Number of Privately Owned Buses
1964-65.....	5,645	124

EDUCATIONAL TELEVISION SERVICE

Purpose and Scope

The functions of the Educational Television are as follows:

1. Administers State funds to school divisions for the support of educational television in accordance with regulations of the State Board of Education.

The 1968 session of the General Assembly appropriated \$2,000,000 for the 1968-70 biennium to assist localities utilizing ETV. This fund is distributed to counties and cities on a 50-50 matching basis not exceeding \$2 per pupil in membership as of March 31 (or the last day of school in March) in those schools using ETV on a systematic basis in their school programs. In addition, localities are eligible for reimbursement for 100 percent of the cost of the ETV service in excess of \$2 per pupil, providing such costs do not exceed the per pupil charge made by each ETV station as of December 31, 1968. If ETV is used only in the high school department or in the elementary department of a combined school, only the membership of the department using it is counted.

2. Cooperates with other agencies and organizations within the State which are concerned with the development and operation of ETV.

Every effort is made to maintain a close working relationship with all agencies and organizations that are concerned with the development and use of ETV in the State. These include the Virginia Advisory Council on Educational Television, the educational directors of ETV stations, and local groups that seek to improve educational programs through the use of ETV. This relationship enables the Department to keep abreast of developments and programs and to identify areas in which it can render assistance.

3. Works with school divisions in developing more effective use of ETV. The Educational Television Service:

- (a) Assists local school divisions in planning and conducting workshops, short courses, and seminars to develop knowledge and skills for the effective use of television.
- (b) Assists in planning and conducting demonstrations, seminars, and workshops for prospective studio teachers.
- (c) Develops local leadership by working with personnel responsible for encouraging and improving the use of television in local school systems.

4. Encourages institutions of higher education in developing programs for training teachers in the use of ETV.

During the period of professional preparation, student teachers should become skilled in the teaching media, materials, and methodology involved in ETV. Such preparation enables the "receiving" teacher to play her supporting role more effectively.

5. Coordinates activities related to educational television in the public schools.

The Department encourages the exchange of information and services among the ETV stations. The exchange of video-tapes, for example, reduces duplication of effort and permits specialization by the stations in the production of high quality programs.

6. Provides information concerning developments and activities related to educational television in Virginia and in other states.

Many inquiries concerning ETV in Virginia and in other states come to the Department. The ETV Service has developed library resources which enable it to provide a centralized information service for ETV personnel and for other interested persons and groups.

Activities

During the 1968-69 school year, the ETV staff administered funds appropriated by the 1968 session of the General Assembly for reimbursing schools using educational television. A total of \$754,607.65 was paid to school divisions during the 1968-69 school year. The reimbursement exceeded by approximately \$200,000 the sum distributed for 1967-68 and was based on enrollment of 756,206 pupils in 1,363 public schools using ETV during 1968-69. The previous year's reimbursement was based on enrollment of 677,961 pupils in 1,253 public schools using ETV.

The staff attended national and regional conferences of the National Association of Educational Broadcasters and responded to inquiries concerning the handbook, "Instructional Television—A Utilization Guide for Teachers and Administrators." The fourth printing of the guide was completed in February, 1969. To date 150,000 copies have been printed and approximately 110,000 were sent to 30 different states and several foreign countries.

In addition, the ETV Service worked with teachers and administrators in pre-school conferences and workshops on techniques for the use of educational television programs. The staff also participated in the utilization program presented at the annual convention of the National Association of Educational Broadcasters.

Other activities for 1968-69 included completion of sequences for a film designed to tell the ETV story and service on a national committee to rewrite the policy statement sponsored by the National Education Association concerning professional rights of studio teachers.

BUREAU OF TEACHING MATERIALS

Purpose and Scope

The major purpose of the Bureau of Teaching Materials and the four regional bureaus, located at Longwood College, Madison College, Radford College, and the University of Virginia, is to improve instruction through the effective use of teaching materials.

The State and regional bureaus perform the following services:

1. Distribute educational motion pictures to: Public schools and State-supported colleges; private degree colleges engaged in training teachers (by special contract); State Department of Health; county and city health departments; State and county agriculture agencies; parent-teacher associations, and other State agencies.
2. Provide consultative services to assist local school divisions in selecting instructional media.
3. Prepare listings of filmstrips, slides, and recordings for purchase with State matching funds provided through the School Libraries and Text-books Service.

4. Evaluate educational motion pictures for purchase by the State and regional bureaus of teaching materials and by local divisions.
5. Provide assistance in the pre-service and in-service training of supervisors and teachers in the use of media for instruction.
6. The duplication of programs on tapes to be used in classroom instruction.

Accomplishments

The following accomplishments were realized during the 1968-69 school year:

DISTRIBUTION OF EDUCATIONAL MOTION PICTURES. A total of 470,017 educational motion pictures were booked from State, regional, and division teaching material centers. There were 55,923 prints of educational motion pictures available.

PUBLICATIONS. The bulletin, "Educational Motion Pictures for Virginia's Public Schools", was revised and distributed to all public schools.

The catalogue, "Educational Tape Recordings", was revised and distributed to Bureau of Teaching Materials representatives in all schools.

TAPE DUPLICATION. During the year 883 programs were recorded on tapes from the Bureau of Teaching Materials tape library for public schools. Requests were received for 173 tape recordings of State conferences and 136 copies of programs were prepared on tapes for other services.

EVALUATION OF MATERIALS. During 1968-69 the Department of Education's professional staff evaluated 400 motion pictures. Purchases for State and regional bureaus were made from the approved list. The staff also previewed and recommended for the State-aid list 350 recordings, 975 transparencies, 221 filmstrips with recordings, 1,296 filmstrips, 113 sets of study prints, six multi-media kits, 12 sets of filmstrips with study prints, and 400 slides.

EQUIPMENT USED BY STATE. There was an increase in the use of audio-visual equipment by personnel of the State Department of Education and other State agencies. Over 600 requests were filled for: 16mm projectors; filmstrip projectors; overhead projectors; slide projectors; filmstrip viewers; tape recorders; record players; and projection screens.

AUTOMATED INSTRUCTIONAL MEDIA SYSTEM. A detailed study was conducted by the Division of Educational Research and Statistics and the Bureau of Teaching Materials to develop an automated film distribution system. It is anticipated that this program will be in operation in September, 1970.

GRAPHICS SERVICES. The graphics services of the Bureau of Teaching Materials produced over 500 overhead transparencies and 200 35mm slides which were used by various divisions and services in the Department.

REGIONAL CONFERENCES. Educational media conferences were sponsored for media directors and/or directors on instruction. The purpose of these conferences was to bring together media personnel to discuss topics such as services of a division media center, cataloging of non-book materials, and quantitative standards of materials and equipment. Representatives from 45 school divisions attended these meetings.

VISITATION. The professional staff of the Bureau of Teaching Materials visited 40 school divisions, participated in 11 conferences and visited six colleges. To promote the use of educational media in the State.

EVALUATIONS. Evaluations of the local school division media programs were requested by six school divisions: Lynchburg, Prince William, Halifax, Dickenson, Augusta and Nansemond. Comprehensive reports were presented following the evaluations.

JOINT MEDIA REPORT. The Bureau of Teaching Materials cooperated with the School Libraries and Textbooks Service to prepare a report on the use of media materials in the public schools in Virginia. The resultant computer write-outs will show the ratio of media materials and equipment per teacher in each school. This information will be compared with the State and national standards.

FILM PRODUCTION SERVICE

Purpose and Scope

The primary responsibility of the Film Production Service is to produce motion pictures and filmstrips on Virginia history and natural resources for public schools in the State. Films dealing with other areas of public education also are produced as well as films for other State governmental agencies.

The secondary responsibility of the Film Production Service is to support the Department of Education in the production of informational and public relations color slides, still photographs, tape recordings, and other audio-visual aids.

The Film Production Service has the supervisory and technical staff to professionally produce 16mm motion pictures in sound and color, still photography, tape recordings, and other audio-visual aids. In producing educational motion pictures the staff does research, writing, photography, editing, sound recording, and distributes the finished film.

Accomplishments

During the year the following projects were completed:

VIRGINIA FORESTRY SERIES. The 10th and final filmstrip in this series, *Careers in Forestry*, was completed.

FOREIGN LANGUAGE PROJECT. Three filmstrips were produced on Ancient Rome. These were: *The Roman Forum*, *The Buried Cities of Pompeii and Herculaneum*, and the *Monuments of Rome*.

PRACTICAL NURSE EDUCATION. A filmstrip on practical nurse training in the public schools.

Sets of color slides were produced for: the Division of Secondary Education (social studies for special showings); School Libraries and Textbooks Service for special showing; and the Virginia Music Camp.

Public relation photographs and photographs for the Department's magazine, *Public Education in Virginia*, also were taken in response to requests. Special assistance also was given in connection with conferences held by various services and divisions in the State Department of Education.

Work in Progress

The following films were in production at the end of the fiscal year:

Cooperative Office Education: 11 minutes, color. The film shows the operation of a high school Cooperative Office Training program in which students, working part time and attending school part time, learn the role of office worker in today's business.

Educational Television, The Fourth Network: 21 minutes. Instructional aspects of educational television are documented in an organized sequence which traces the development of a program from its inception to studio production. Educational and cultural programs are covered with excerpts from various programs.

Science Lab Safety—Part I: 20 minutes, color. Emphasizes to the student the importance of safety measures when using laboratory equipment and performing experiments in the school science laboratory.

New State Parks: 12 minutes, color, 1969. A film for the State Park Commission on five new parks which are being developed throughout the State.

A Certain Degree of Instruction: 30 minutes, color. The content of this film will include the significant periods of growth in public education and its contributions to the Commonwealth, particularly since the establishment of the Public School System in 1870.

Film Distribution

The Film Production Service sold 1,750 filmstrips and 78 motion pictures to the Virginia public schools during the year. Sixteen prints were sold out of state and more than 120 rentals of films were made to public schools in other states.

SCHOOL LIBRARIES AND TEXTBOOKS SERVICE

Purpose and Scope

The School Libraries and Textbooks Service assists local school divisions in improving the quality of media services in the public schools of the State. Guidance and leadership are provided by:

1. Offering supervisory and consultative service through visitation and correspondence.
2. Assisting in the establishment of library programs in new schools and in the reorganization of library programs in old schools.
3. Informing media personnel and other educators in the State of the services of the Department and of new developments in the field of library service through speeches and through distribution of the "Newsletter" at regular intervals throughout the year.
4. Preparing and distributing lists of approved teaching materials, bulletins, and memoranda.
5. Maintaining a professional library and a collection of juvenile literature to serve educational personnel.
6. Distributing State-aid funds for the purchase of library materials and processing State-aid library orders.

7. Administering the textbook program by coordinating the State program for the adoption of basic textbooks.
8. Administering the Title II Public Law 89-10 program by distributing funds for the acquisition of library resources, textbooks, and other instructional materials available under the federal act.
9. Reviewing library layouts for new schools.
10. Reviewing printed materials submitted by publishers for inclusion on the State-aid library list.

Accomplishments

School Library Development Fund. The School Library Development Fund provides help to localities for the purchase of materials for new school libraries. The fund, which was established in 1964, provides one \$60 unit for every 20 pupils enrolled in eligible schools. During the past year grants were made to 69 schools in 46 divisions. Orders totaling \$76,520 in State funds were placed with publishers.

Books Reviewed for State List. During 1968, 5,606 books were reviewed by members of the Elementary Materials Committee, the High School Materials Committee, and members of the professional staff of the State Department of Education. More than 100 school librarians assisted in this work. The State Board of Education approved the addition of 5,190 items to the State-aid purchase list, including audio-visual materials reviewed by the Bureau of Teaching Materials.

Professional and Library Collection Available to Educational Personnel. The professional library of the State Department of Education continued to lend materials to school personnel throughout the State and to the staff of the Department. A number of new books were added to the collection. The library subscribes to 135 magazines of professional interest which are available to staff members of the Department.

Book Exhibits. The School Libraries and Textbooks Service maintains a collection of outstanding books which are approved by the State Board of Education for purchase with State-aid library funds for Virginia schools. The books are available for use by school personnel, and portions of the collection are used as exhibits to aid teachers, librarians, and parents in selecting books for purchase. An exhibit of new books approved for the 1969 list was used in five school divisions during the spring of 1969.

Certified Librarians. During the 1968-1969 school year, Virginia Public schools employed 1,103 librarians with teaching certificates endorsed for library science. Of this number, 571 were employed in 1,318 elementary schools, 407 in 359 secondary schools, 83 in 129 combined schools, 33 in supervisory positions, two in professional libraries, and seven in central processing centers.

State-Aid Funds. During 1968-69 State funds amounting to \$795,010 were budgeted for the purchase of library materials for the public schools of Virginia. This appropriation, supplemented by local contributions and refunds from publishers and dealers, permitted the placing of orders amounting to \$1,290,756.

Free and Rental Textbook Systems. The 1968 General Assembly appropriated funds to be used to reimburse localities providing free or rental textbook systems at the rate of \$2 per pupil enrolled in these localities. During the 1968-69 school

year, reimbursement amounting to \$1,271,522 was made to 80 divisions. Of this amount, \$604,558 was for free systems, and \$666,964 for rental systems.

Operation of Title II of Public Law 89-10. During 1968-1969 Virginia received \$1,057,993 under Title II of Public Law 89-10 for the acquisition of school library resources, textbooks, and other printed and published instructional materials for children and teachers in public and private elementary and secondary schools.

Demonstration School Libraries Project. Approximately \$100,000 of the Title II, Public Law 89-10 funds for 1968-1969 was used to support the Demonstration School Library Project which began during 1967-1968. Three new schools were selected, bringing the total to 12 in the State. A booklet, "Demonstration School Libraries in Virginia", was published and widely distributed in Virginia and out-of-state. As of May 1, 1969, more than 73,000 persons including librarians, college students, administrators, teachers, and parents had visited library projects in the original nine schools.

Staff Addition. Mrs. Lydia D. Faulkner joined the staff of the School Libraries and Textbooks Service as assistant supervisor of school libraries for Title II on July 15, 1968.

DIVISION OF VOCATIONAL EDUCATION

The Division of Vocational Education serves school divisions in developing an effective vocational program as an integral part of the total curriculum in the public schools. The Division has designed programs for persons attending high school; for those already in the labor market who need training and retraining; and for those who are disadvantaged or have socio-economic or other handicaps which prevent them from participating in the regular vocational program. By recognizing the needs of the individual and of society, these programs contribute to a wholesome economy, satisfactory employment, and a high standard of living. By helping to prepare youths and adults to take their places in an expanding economy, vocational education makes an important contribution to industrial growth in the State.

A concerted effort is being made to increase the number of teachers in training, and to update the content of the teacher-training programs. Emphasis is also being placed on preparing more teachers for innovative and exemplary programs, such as educational television, pre-vocational programs, cluster programs for the skilled trades, data processing, joint programs between services, gainful home economics related occupations, and off-farm agricultural related occupations.

Assuring that people are equipped with skills which are useful in our changing world of work is the continuing challenge faced in vocational education. In the years ahead, it is expected that employers will require more specialized training for a higher percentage of their workers. Greater flexibility in vocational education offerings will provide training for a wider range of occupations in keeping with labor market demands and scientific and technological developments.

Reports of the activities of the services of the Division of Vocational Education for the fiscal year 1968-69 follow in this order: Vocational Agriculture, Business Education, Distributive Education, Home Economics Education, Industrial Education, Manpower Training, School Food Service, Veterans Education, and Construction of Vocational Facilities.

AGRICULTURAL EDUCATION

The purpose of the Agricultural Education Service is to lead the development and improvement of all phases of vocational education in agriculture, including programs for high school students and young and adult farmer groups. The general aim of these programs is to provide basic instruction for agricultural occupations and to develop agricultural competencies needed by individuals engaged in or preparing to engage in both on-farm and off-farm agricultural occupations. Therefore, the primary function of the Service is to assist school administrators and teachers in developing and improving the instructional program in agricultural education based on the needs of students. Assistance was given by the staff through (a) observation, (b) discussion, (c) on-farm and job instruction, (d) evaluation of local programs, (e) group conferences, (f) in-service training programs, and (g) correspondence and other appropriate means. The staff, in cooperation with teacher education institutions, prepares instructional materials and curriculum guides for use by teachers of vocational agriculture, conducts research, and assists in planning and conducting in-service and teacher education programs.

During the year the staff continued to revise the agricultural education curriculum to meet the demands of today's concept of the total industry of agriculture. Service personnel were organized to develop, refine, and publish a series of seven curriculum guides for use in the two-year basic course and five options open to third- and fourth-year students. The optional courses include agricultural production, agricultural machinery service, agricultural business, conservation and forestry, and ornamental horticulture. Fifty-two developmental programs emphasizing one of the four options other than production agriculture were conducted. Further emphasis was given to the placement of students for supervised occupational experience in agriculture, and to the evaluation of local programs in agricultural education.

In 1968-69 the staff provided professional services to 206 high schools in the 85 counties and six cities offering agricultural education programs. In these schools 18,956 high school students were enrolled in regular agricultural education classes, 2,847 in general mechanics classes, and 238 in classes for students with special needs. In addition, 2,127 out-of-school youth were enrolled in 117 young farmer classes, and 5,372 farm men and women were enrolled in 256 evening classes devoted to the discussion of production, conservation, marketing of farm products, and farm-management problems. Adult agricultural mechanics classes offered instruction in the selection, operation, preventive maintenance, repair, and construction of farm machinery. During 1968-69, 22,065 persons participated in 58 school community cannery programs devoted to the production and conservation of foods for family consumption. This is a joint activity of the Home Economics and Agricultural Education Services.

Staff personnel cooperated with division superintendents, high school principals, and teachers of vocational agriculture, to improve facilities, equipment, and curriculum materials for vocational agriculture. Five schools erected greenhouse facilities for teaching ornamental horticulture. The results of developmental programs and studies conducted last year continued to provide important guidelines for the staff, local school officials, and teachers in continuing their redirection and reorientation of agricultural education to meet the needs of today's rural youth.

High School Students. During 1968-69, 9,703 high school students received occupational experience through supervised farming programs, 2,360 were enrolled in placement on farms and in off-farm agricultural businesses for occupational experiences, and 3,254 students received occupational experiences primarily in school facilities such as agricultural mechanics shops and greenhouses. The total labor income for these students was \$5,093,785.

Future Farmers of America. The staff provided guidance for the Future Farmers of America, a national organization of students studying agricultural education in high schools. Membership in 199 FFA chapters in Virginia totaled 14,083 and more than 1,000 members attended the FFA Convention at Virginia Polytechnic Institute.

In cooperation with the Home Economics Education Service, the staff provided guidance and leadership in conducting the FFA-FHA Camp at Morgart's Beach and the J. R. Thomas Camp, near Petersburg. During the summer of 1968, 1,275 boys and girls attended these camps, which provided leadership training and recreation.

Young Farmer Classes. A total of 2,127 young farmers were enrolled in 117 classes. The staff provided guidance for the Statewide program which is designed to assist young farmers in becoming better established in the business of farming and to help them keep abreast of the many changes in farm technology. The Young Farmer Convention was held at the Hotel Chamberlin in February, in conjunction with the meeting of the Young Homemakers of Virginia. Approximately 500 young farmers and their wives discussed common problems and made plans to expand and improve the Young Farmer and Young Homemaker training programs. Instruction in all phases of farm management and agricultural mechanics was emphasized during the year. A Statewide series of five educational television programs on agricultural machinery maintenance was developed and telecast to supplement instruction for young and adult farmers.

Farm Families. A total of 5,372 adult farmers received an average of 60.1 hours of class instruction in evening classes and an average of two on-farm instruction visits during the year. Farmers enrolled in agricultural mechanics classes also repaired, overhauled, and/or constructed farm equipment.

Participation in the food production and conservation program was promoted by the cooperative efforts of the staff and teachers of agricultural education and home economics. In school community canneries the equivalent of 2,196,203 pints of food was processed by persons receiving instruction in the preservation of food for family consumption.

Conferences, Workshops and Other Activities. During the year the Agricultural Education Service assumed leadership in conducting a number of State, area and group conferences to assist localities in providing in-service training for agricultural education teachers. "Further Development in the Program in Agricultural Education" was the theme of a Statewide conference held at Virginia Polytechnic Institute in July. The staff also helped plan and conduct 174 State, area, and group conferences for agricultural education teachers.

In cooperation with the teacher education staffs at VPI and Virginia State College, the Agricultural Education Service conducted in-service training programs with emphasis on program planning, agricultural mechanics, farm electrification, agricultural business, conservation and forestry, farm management and ornamental horticulture. A series of workshops was devoted to agricultural mechanics, electricity, small engines, and motor analyzing equipment. Staff assistance also was given in: developing lists of curriculum materials and equipment needed for teaching agricultural education; planning agricultural education programs in urban areas which are being requested in increasing numbers, and implementing standards and guidelines for young and adult farmer programs.

In cooperation with guidance and other vocational services the staff participated in a Vocational Guidance Institute for high school counselors and principals.

The staff assisted with a one-week national conference at Virginia Polytechnic Institute sponsored by the American Institute of Cooperation.

NOTE: Six cities and 85 counties were served by the State program of agricultural education.

BUSINESS EDUCATION

The Business Education Service is concerned with developing (1) the vocational knowledge, skills and attitudes needed by youths and adults for employment and advancement in business careers; and (2) the knowledge, understanding, and non-vocational skills needed by all persons in everyday contact with business and economic issues. The major function of the service is to improve instruction in business and office education at the high school, adult, and teacher-education levels.

Instructional activities are being revised to more effectively help students understand automation processes and perform efficiently in business using data processing procedures. Several high schools offered introductory courses in data processing and 16 high schools offered a data processing curriculum.

Reimbursement from federal and State funds on a matching basis with local funds were used to purchase instructional equipment for vocational business education. One hundred-nine high schools in 53 school divisions participated in these funds, as well as post-high school and four teacher education institutions.

Business Education Service personnel promote and work actively with the following phases of the school program:

Secondary School Program. During 1968-69, 1,368 business and office occupations teachers taught business subjects in 348 high schools, 37 junior high schools, and two schools for deaf and blind. There were 534 full-time vocational teaching positions; 167 received salary reimbursement through vocational education funds. There were 10 full-time and two part-time local business education supervisors in the State, including four who were employed during the year. Of the 348 high schools, 314 had either reimbursed or reimbursable programs—an increase of nine over last year.

Post-High School Programs. In two State colleges and two post-secondary schools, offering post-secondary programs of less than college level, 25 teachers taught 413 students. They were enrolled as follows: data processing, 85; secretarial, 162; accounting, 44; clerical, 114; typewriting, 8.

Programs for the Handicapped. Well defined programs for the handicapped were offered at the Woodrow Wilson Rehabilitation Center, which employed six teachers and one supervisor, for an enrollment of 164 students. Very limited offerings in the two schools for the deaf and blind enrolled 31 students.

Adult Programs. Seventy high schools in 34 school divisions and one college enrolled 11,239 adults in 651 evening classes. Of these students, 3,655 were enrolled in supplementary classes and 7,584 were in preparatory classes. Two school divisions offered daytime adult programs for unemployed persons.

Adult classes ranged from typewriting to computer programming; from supervisory performance appraisal to managerial economics; from records management to applied business statistics; and from ABC shorthand to closed microphone court reporting. Classes were held for specific groups, such as health and agriculture departments, police, officers, executive housekeepers, medical assistants, and members of an administrative management society.

Vocational Office Training. Vocational Office Training, a cooperative, part-time work training program in business education, was offered in 107 high schools for 1,936 students. Their annual earnings amounted to \$2,082,956, an average of \$1,075 each.

Conferences, Workshops, and Services. Two in-service workshops were held for the benefit of teacher educators and the State staff. The purpose was to review the progress being made in establishing block-time programs in business education.

Two conferences were held for local business education supervisors to discuss policies, procedures, and problems in business education.

The Business Education Service, in conjunction with the Educational Television Service produced a course entitled "Introduction to Data Processing for Business Teachers," which was telecast in cooperation with five educational television stations and one commercial station. This course consisted of 30, half-hour telelessons. A total of 493 teachers, 30 percent of the full-time business teachers in the State enrolled for the three semester hours of undergraduate credit offered by eight colleges. Many others audited the course. State tuition grants were available to teachers completing the course.

Four in-service workshops in automated data processing were held at three State colleges which train business teachers. One program was funded for the second year through the National Science Foundation with stipends for the teachers attending. Two extensions courses were offered by two teacher-education institution for teachers of block-time programs.

Six area conferences were held during the year to discuss the implementation of the block-time programs in the high schools. Four of these conferences were sponsored jointly by the State staff and teacher education institutions. Sixty-one per cent of the business teachers attended these conferences.

Two conferences were held for teachers of the pilot programs in block-time teaching, and one workshop for teachers of disadvantaged students was sponsored by the Business Education Service and Virginia State College.

Bi-monthly meetings of VOT coordinators were held in seven geographic areas. The annual Business Education Conference was concerned with the development of understandings about the new block-time curriculums and the development of instructional outlines.

Plans were made to begin five different types of programs for disadvantaged

youth on a pilot program basis. A plan is being prepared for a research project on the use of an extensive office simulation with the new block programs.

There were 145 active chapters of the Virginia Chapter, Future Business Leaders of America, with 5,482 members. Five regional planning meetings were held in the fall; six regional meetings and the nineteenth annual convention was held in the spring.

A follow-up study of the 10,034 June 1968 graduates in business education was completed giving the following information:

TABLE 21—ENROLLMENT OF STUDENTS IN VOCATIONAL BUSINESS EDUCATION ACCORDING TO BUSINESS CURRICULUMS OR JOB OBJECTIVES

CURRICULUM	Sex	Grade 10	Grade 11	Grade 12	Total
Stenographic.....	M	74	80	112	266

DISTRIBUTIVE EDUCATION

1968-69

The staff of the Distributive Education Service assists local school administrators, distributive education teachers, and college personnel in the development of the distributive education program to meet the following goals:

- (1) To prepare high school youth for successful employment and careers in the field of distribution;
- (2) To provide middle-management training programs at the junior college level to meet the need for junior executives and specialty salesmen in retail, wholesale, and service fields;
- (3) To provide a community adult-training program for persons preparing to enter or already engaged in a distributive occupation;
- (4) To provide the undergraduate and graduate teacher education programs to prepare the teachers, supervisors and other professional workers needed for a rapidly expanding program.

The staff of the Distributive Education Service provided professional services to 195 high schools, 13 junior high schools and five colleges in 56 counties and 29 cities where the distributive education program was in operation. The nature of these services included: (1) conferences with school administrators, (2) individual visits with teachers, (3) cluster meetings of teachers, (4) in-service workshops and conferences, (5) participation in local pre-school conferences, and (6) evaluation of programs.

As a result of these staff activities considerable improvements were made during the year in program standards, facilities, equipment, and quality of instruction in distributive education. The program was expanded to serve many more youth and adults desiring training which will enable them to function more effectively in this phase of the State's economy.

Program Development in Keeping With Current Needs

Enrollment in the distributive education high school program increased from 9,376 to 9,585.

The program was expanded to include 20 new programs at the high school level. Eight of the new programs were opened in counties whose students, prior to this year, have not had an opportunity to prepare for careers and employment in distribution.

Twenty-six schools in 13 school divisions were equipped with new or replacement equipment for the distributive education program.

One hundred sixty-five high schools in 76 school divisions and three junior colleges enrolled 26,547 adults in over 1,090 preparatory and supplementary classes for distributive occupations taught by 239 DE teachers and 202 part-time instructors from business and industry. Of these, 15,527 persons were enrolled in classes to upgrade them on the job, and 11,020 were in preparatory classes.

Increased enrollment in courses offering training for the travel industry resulted in Virginia advancing from twenty-eighth to fifth place among states which offer a specialized hotel-motel diploma program.

Distributive education cooperated with the Virginia Retail Merchants Association in offering special shoplifting prevention clinics in every community having a DE program. A State committee of merchants, area adult instructors, and

DE State staff members met to review the course outline and to suggest needed improvements.

A week-long workshop held for DE adult education personnel dealt with adult curriculum development and techniques of training businessmen and other specialists as part-time instructors of adult classes.

Programs for Persons With Special Needs

Distributive Education programs to prepare persons with special needs for distributive occupations were offered in four junior high schools and two senior high schools. In addition to current programs, four more school divisions plan to offer the "Education for Employment" course beginning in the 1969-70 school year.

One school division conducted a 10-hour Distributive Education pre-employment course for 17 welfare mothers, and two school divisions offered the pre-employment course to unemployed persons in cooperation with the Virginia Employment Commission. A total of 3,368 persons were enrolled in 124 classes for adults with special needs.

New and Innovative Programs and Activities

The Distributive Education curriculum is being reorganized to insure that students will develop necessary abilities for distributive employment, as follows:

(1) social competencies; (2) basic competencies in mathematics and communications; (3) product or service technology; and (4) the marketing competencies of economics, management, market research, merchandising, operations, sales promotion and selling.

The two units of study already completed for the advanced cooperative course are "Trends in Distribution" and "Merchandising Mathematics."

A participation activities manual was prepared to supplement the curriculum for the basic high school course. This manual is composed of individual vocational learning experiences or activities which are designed to provide application of classroom instruction. In addition, a projects manual for the basic course is being prepared. This manual will include project descriptions and project training records.

The following distributive education research studies were completed:

1. Miles, Benton E.—"The Construction of a Course, 'Administering an Adult Program,' for a Distributive Teacher Education Curriculum"
2. Jamison, George—"An Investigation to Develop a General Plan to Improve Advertising for the Small Business"
3. Willis, Bob —"An Analysis of the Extent of Potential Membership and the Use of Services Offered by the Richmond Retail Merchants Association"
4. Ahalt, Henry—"An Experiment with Programmed Instruction in Salesmanship for Distributive Education High School Students"
5. Miller, Barry—"A Study to Determine the Effectiveness of the Distributive Education Real Estate Adult Program in Arlington County"

The third phase of the research study, "A Competency Pattern Approach to Curriculum Construction in Distributive Teacher Education," featured a National

Dissemination and Interpretation Seminar in Distributive Teacher Education. This seminar was held on the campus of the Virginia Polytechnic Institute August 25-30, 1968, and attracted 45 teacher educators and curriculum workers from throughout the United States.

Thirteen junior high schools in Richmond offered distributive education for the first time at the ninth grade level. Nine DE teacher-coordinators participated in curriculum development workshops and have constantly evaluated and upgraded the program.

A specialized DE course in fashion merchandising was offered in the Arlington-Fairfax area to provide vocational training for students with career interests in buying, fashion design, merchandising management and stock control.

Interest has been indicated in two school divisions in a specialized petroleum marketing and hospitality training program at the high school level. Advisory committees have been appointed and curriculum is being developed for future experimental programs.

The following kinds of studies were initiated to evaluate the distributive education program on a Statewide basis:

1. Employment status of youth and adults enrolled in pre-employment courses.
2. Status of students enrolled in basic courses who did not continue in cooperative programs.
3. Status of students who dropped out of the program during the school year.
4. Status of students enrolled in junior high school experimental programs.

The State Department of Health developed special material on food service sanitation to include in distributive education adult courses for the travel industry.

In-Service and Pre-Service Teacher Education

Teacher education programs in distributive education at Virginia Commonwealth University, Virginia Polytechnic Institute and Old Dominion College constitute one of the largest State programs in the nation with a total enrollment this past year of 170 undergraduate students working toward B.S. degrees in distributive education. These students included 78 at VCU, 85 at VPI, and seven at ODC.

During 1968-1969, VPI and VCU offered 20 different in-service graduate and undergraduate courses for 188 distributive personnel. In the distributive education graduate program at VCU, 62 DE coordinators were enrolled in part-time graduate study. At VPI, four DE coordinators received master's degrees in vocational education and four full-time graduate students in DE were enrolled at VCU.

The teacher educators at VCU and VPI, in cooperation with the distributive education State supervisory staff, conducted six in-service workshops for DE teachers.

The DE supervisory staff conducted a total of 34 in-service workshops with 372 local DE personnel participating. Two of these workshops were devoted to guidance with counselors participating; five were devoted to curriculum development; two were held for new coordinators; three were for local supervisors; four dealt with the adult program; and two were held for special needs teachers.

Distributive Education Clubs of America

Membership in the Virginia Association of the Distributive Education Clubs of America reached an all-time high of 9,579 members in 198 local chapters during 1968-69.

Virginia DECA received national recognition with the election of a State student as southern region vice president of the secondary division. The Virginia Merchandise Manual entry placed third in the nation.

The recently created "Policy and Planning Committee," composed of teacher-coordinators who have demonstrated outstanding leadership in DECA, has continued to play an important role in the management and direction of every phase of the DECA youth program. This adult organization serves to guide and lead the nine State officers and 20 junior board directors who are chosen to lead their respective districts or areas and the State association.

The Virginia DECA Foundation scholarship awards totaling \$3,150.00 were given to 10 Virginia DE students.

HOME ECONOMICS

The staff of the Home Economics Education Service serves secondary school administrators and home economics teachers in the development of a program which has these goals: preparation for the vocation of homemaking; preparation for employment in occupations using home economics knowledge and skills; and motivation of students with scholastic and leadership abilities to pursue college education in preparation for professional careers in home economics.

The staff works cooperatively with Virginia colleges in the pre-service education of students who are preparing to teach home economics.

Scope of Program. In 1968-69, home economics education programs operated in each of the State's 131 school divisions. In these divisions 484 high schools offered home economics programs under the direction of 847 teachers. Enrollment in all home economics courses for in-school and out-of-school totaled 101,576.

The in-school program enrollment totaled 81,256, including 53,881 pupils in regular home economics classes (grades eight-12); 676 in home economics-related employment courses; 2,483 in homemaking courses for students with special needs; and 251 in occupationally oriented courses for students with special needs. In addition, 1,642 seventh-grade students were enrolled in homemaking classes for a full year, and 22,323 seventh- and eighth-graders received instruction in home-making for less than a full year.

The Home Economics Service reached 20,320 out-of-school youth and adults in various programs; 5,272 were enrolled in homemaking classes for adults; 729 received instruction in homemaking through the organization, Young Homemakers of Virginia; 240 adults were enrolled in other home economics classes which are preparatory for enrollment in employment courses; 13,574 adults participated in food production and conservation classes. This phase of the program is conducted in cooperation with the Agricultural Education Service.

Improvement of Instruction. Supervisory personnel visited 280 schools and worked with 641 teachers to review teachers' work plans for the year, to observe units of instruction being taught, to determine strengths and weaknesses in the program, and to make suggestions and recommendations for improvement in local programs.

Staff members worked with local administrators and teachers in 77 group meetings to discuss program offerings and the scheduling of courses in homemaking and in gainful occupations using home economics knowledge and skills.

In cooperation with school administrators, the State staff served on evaluation committees which studied 29 secondary school home economics programs.

Two workshops were conducted to aid 70 teachers in developing employment courses as a part of local home economics programs.

A Statewide in-service education conference was held for the purpose of assisting home economics teachers to plan programs for the year ahead and to determine ways of improving instruction. The conference program focused on promoting and developing home economics courses for employment; instructing individuals with special needs; working cooperatively with other groups in the school and community; and improving the instructional offering in homemaking for youth and adults.

Development of Curriculum Materials. The supervisory staff and teachers continued work on a major revision of the curriculum guide for the homemaking phase of the home economics program. Emphasis in the guide is being placed on the consumer problems of individuals and families.

To aid in the development of the gainful occupations phase of the program, curriculum materials in foods, clothing, homemaker's assistant services, and child care workers have been prepared and made available to teachers in the schools which offer these courses. Materials have been distributed and revised as needed.

Youth Organization, Future Homemakers of America. Staff members planned and directed a Statewide leadership training meeting which was attended by 482 representatives and advisers of the youth organization, Virginia Association, Future Homemakers of America. This organization, with a membership of 17,720 persons in 348 chapters, is designed to enrich and supplement classroom instruction. Its membership is made up of students who are enrolled, or have been enrolled, in the home economics program. FHA activities supplement instruction in improving family living and in preparing for entrance into home economics-related occupations.

Instruction for Adults. The staff worked with local school administrators and teachers to develop instructional programs in homemaking for adults and members of Young Homemakers of Virginia.

These courses included instruction in consumer problems of families, clothing selection and construction, meal planning and preparation, child development, and home management. Primarily they were taught by regular home economics teachers as a part of the total program; however, in situations where heavy in-school enrollment made this impossible, part-time teachers were employed.

Gainful occupation courses which prepare adults for work as homemakers' assistants were taught in Norfolk and Accomac. Other classes prepared adults for entering and advancing in such occupations as child care service, clothing service, and food service.

Instruction for Pupils with Special Needs. Courses in home economics were provided for 2,734 students with special needs who were not functioning effectively in the regular school program. These courses contributed to holding potential dropouts in school and to making them better homemakers and wage-earners.

Improvement of Space and Facilities. Assistance was given to school divisions in planning 31 new and remodeled departments and in setting standards for purchasing equipment.

Staff members helped 33 schools and 107 teachers prepare budgets and select equipment. Instructional equipment was placed in 16 schools and facilities for instruction in home economics-related employment courses was improved in the same number of schools.

Cooperative Work with Other Services and Divisions. Staff members participated in a Statewide vocational guidance summer institute which was held to acquaint high school guidance counselors with opportunities and offerings in all fields of vocational education. Pertinent interpretative materials about the home economics education program were distributed to the 282 guidance counselors, administrators, supervisors, and vocational teachers who attended the institute.

In cooperation with the Bureau of Teaching Materials, new home economics reference books were reviewed and evaluated and lists of recommended books were made available to local school administrators and teachers.

Plans for new home economics departments were reviewed in cooperation with the School Building Service, and recommendations for revisions were made to provide optimum facilities for instruction. These plans included departments for instruction in both homemaking and occupational home economics.

Cooperative Work with Colleges Training Home Economics Teachers. Heads of home economics departments and teacher educators from eight Virginia colleges approved for the preparation of home economics teachers met twice during the year with members of the State staff to discuss new developments and progress being made in the home economics program. Special emphasis was placed on the preparation of home economics teachers who will instruct high school courses for occupations using home economics knowledge and skills as well as homemaking courses which emphasize consumer problems, management and child development.

As a result of these meetings each college agreed to study and evaluate current teacher-education programs and to find ways of incorporating experiences which will assist pre-service teachers in their preparation for teaching employment courses. Each college agreed to take the following steps:

Discuss the objectives of home economics courses for employment and review curriculum materials for such courses with teaching candidates;

Place student teachers in schools with home economics programs which include all phases of a well-rounded program;

Assist home economics education majors to plan individual summer work experience programs in occupations using home economics knowledge and skills;

Guide home economics education majors to select electives from home economics subject areas in which they have a special interest and in which there are employment opportunities;

Plan courses at the college level to prepare candidates to teach home economics courses for employment as well as homemaking.

The assistant supervisors of the Home Economics Education Service visited colleges in their respective areas and met with home economics education majors to discuss the program being developed in secondary schools. They also worked closely with the teacher educators in the colleges which train home economics teachers.

TRADE AND INDUSTRIAL EDUCATION

The Trade and Industrial Education Service provides services and leadership designed to improve instruction in trade and industrial education.

Trade and industrial education includes instruction for careers in trade and industry, and in health and technical occupations. It provides occupational training of a preparatory and supplementary nature in each of these areas. Preparatory programs in trade and health occupations also are provided for youth with special academic, social, or economic needs.

Preparatory Programs

Trade and Industrial (T and I) Occupations

Preparatory programs were provided for students in grades nine through 12 who had made an occupational choice and were pursuing comprehensive high school training leading to entrance level employment. These programs provided foundations for the skilled crafts and service trades such as carpentry, auto mechanics, drafting, electrical trades, cosmetology and machine shop. Trade classes were taught by 374 teachers in 190 secondary schools.

Industrial Cooperative Training programs were conducted for high school juniors and seniors who were 16 years of age or older. These students attended school half of each day and received on-the-job work experience in their chosen occupation the other half of the day. Systematic training was given on the job and supplementary instruction which related to the training was given in the high school. Industrial Cooperative Training classes were taught by 91 teachers in 88 schools.

Post-secondary preparatory programs were provided for persons who had graduated from, or had otherwise left, high school and were pursuing training on a full-time basis. The scope and content of these programs were the same as for secondary programs, but they were in greater depth due to the additional hours provided for full-time study. Post-secondary T and I preparatory classes were taught by 14 teachers in two schools.

Adult preparatory classes were provided on a part-time basis, usually during evening hours, for persons preparing to enter an occupation. Short-term, full-time classes were conducted in certain localities to provide skills useful in local industries. Adult T and I preparatory classes were taught by 40 teachers in 30 schools.

Health Occupations

Secondary preparatory classes which consisted of pre-clinical instruction leading to a license for practical nursing were conducted for qualified seniors in 27 secondary schools by 73 teachers. Medical assistant, health aide, and nurses aide classes were provided in four secondary schools by four instructors.

Post-secondary preparatory classes consisting of clinical instruction were provided for the practical nursing students who had satisfactorily completed the pre-clinical phase of this program. Post-secondary, pre-clinical, and clinical classes were held for other practical nursing students. Five programs were conducted by 24 teachers. Programs for certified laboratory assistants, medical transcriptionists, X-ray technologists, dental hygienists, dental technologists, operating room technicians, nurses aides, intensive care assistants, radiologic technologists, and ward clerks also were conducted in 12 schools by 14 teachers.

Technical Occupations

Secondary preparatory programs were conducted in several high schools for students in the eleventh and twelfth grades who desired employment as highly skilled technicians. For such students one or more years of post-secondary training is recommended. Emphasis is placed on the application of mathematics and science in technical problem solving. The technology of electronics was taught by six teachers in two schools.

Post-secondary preparatory programs were conducted for persons who had completed high school and were in full-time attendance at a post-secondary institution. The curricula and purpose of these classes were the same as those for secondary programs, but were much greater in depth. The classes included the technologies of drafting and design, air conditioning and refrigeration, civil and highway design and construction, electronics and dental technology. Post-secondary technical classes were conducted by 39 teachers in two schools.

Adult preparatory technical classes were conducted on a part-time basis during evening hours for persons preparing to enter some phase of technical work. Eighteen teachers in four schools conducted classes in the technologies of civil and highway design, drafting and design, and electronics.

Youth with Special Needs

These programs were conducted in the intermediate and secondary schools for youth with social, economic, or academic handicaps who had made poor adjustments in school. The purpose was two-fold: (1) to provide a means for a student with special needs to learn an occupational skill in accordance with his abilities and to become employable upon leaving school, or (2) to provide opportunities for the student to make sufficient adjustments and to acquire sufficient knowledge to enable him to re-enter regular school programs. Special needs programs were conducted by 91 teachers in 44 schools.

Supplementary Programs

Supplementary programs are designed for employed adults who wish to supplement or upgrade their skills and knowledge in the trade, health, or technical occupation in which they are or have been engaged. The following types of supplementary classes were conducted on a part-time basis by 823 instructors in 101 schools:

Trade—to upgrade skilled craftsmen in their occupational field;

Technical—to update or upgrade technicians in their technical field;

Health Occupations—to improve nursing care. Courses were offered in medications, anatomy, pediatrics, certified companion, and diversional activities;

Supervisory Personnel Development—to upgrade supervisors and other minor executives by increasing their supervisory, teaching, or managerial abilities;

Safety Training for Employees of Electric Cooperatives—to offer on-the-job safety instruction throughout the year;

Apprentice Training—to provide related instruction either in regular unit classes or via a group study plan;

Public Service—to improve technical skills of public service employees, including policemen and surveyors.

Summary of Additional Activities

Expansion of vocational preparatory programs during 1968-69 resulted in 148 additional teachers in 127 new or expanded programs. During the year several local advisory committees were organized.

The Trade and Industrial Education Service staff assisted various teams in conducting community surveys to determine the need for subjects supported by this vocational service. The Service issued evaluative criteria to each school division having Trade and Industrial Education programs. These criteria were returned and are being used as a basis for program evaluation.

A Statewide conference was conducted for trade and industrial personnel. Several curriculum workshops were held.

Two regional meetings and one State leadership conference were held for the youth organization, Vocational Industrial Clubs of America.

Other conferences included two for local supervisors and principals of area vocational schools, eight area workshops for I. C. T. and apprentice coordinators, and pre-school workshops for teachers. Staff members of the Service attended a number of regional and national conferences and institutes.

The following bulletins, brochures, and guides were developed by the Service: TIES (four issues); Follow-Up Report of I. C. T., Trade and Technical Graduates; Annual Statistical Report for Trade and Industrial Education; Trade and Industrial Education Directory; and Listing of Trade and Industrial Library Materials.

INDUSTRIAL ARTS EDUCATION

Industrial Arts Education was supervised through the Industrial Education Service until June 1, 1969. At that time it became a separate service under the Division of Vocational Education and was designated as the Industrial Arts Education Service.

Emphasis was placed on introducing industrial arts personnel and school administrators to new curriculum materials and intensifying the supervisory visitations.

The new General Industrial Arts Guide was distributed and workshops were held to develop a curriculum guide for graphic arts instruction and a guide for school administrators which will explain the contemporary program.

Industrial Arts was offered in 92 school divisions by 350 secondary schools for 65,314 students. The number of teachers of industrial arts rose from 699 the previous year to 758.

MANPOWER TRAINING SERVICE

In accordance with the policies of the State Board of Education in cooperation with the Virginia Employment Commission, the Manpower Training Service is responsible for providing training in occupational categories for unemployed and under-employed youth and adults within the State who qualify under provisions of the Manpower Development and Training Act of 1962, including the Amendments to the Act in 1963, 1965, and 1968. These amendments provide for basic educational training and orientation to the world of work and counseling services for individuals who are excluded from occupational training because of an inadequate educational achievement level. The Act as amended also provides for refresher or other training for individuals who have become unemployed because of the specialized nature of their previous employment or who are in need of specialized skills for advancement. Priority is given to Manpower Training Skills Centers.

Basically, the purpose of the Manpower Development and Training programs is to relieve unemployment caused by automation, shifts in market demands, employment trends and other economic changes and to provide training opportunities for disadvantaged persons in Virginia. The program does not replace the need for existing vocational training but expands and broadens the training programs available for workers in all occupations.

Staff members of the Manpower Training Service work with school divisions in their localities to achieve certain objectives. These include: providing assistance in organizing curriculum guides and course outlines, and in developing standards of occupational competency; preparing budgets for each proposed training program and reviewing upon completion; providing courses in instruction based on the recognized needs of individuals who are to receive training; periodically reviewing and evaluating training programs, including recommendations for improvement and the need for continuing the training; initiating steps to assure that training projects are formulated without delay; maintaining consistent quality and adequacy in the available training; and following up all trainees who have completed courses to help insure their success in the occupation for which they have prepared.

During 1968-1969, 72 manpower training programs were planned, budgeted, and approved to train 2,651 individuals in Virginia. Training was provided in 33 occupational areas in programs operated in 23 school divisions. The length of the program varies from eight to 100 weeks, depending on the occupational area.

Programs starting during 1968-1969 and those continuing from 1967-1968 total 140 with an enrollment of 3,574. Manpower Development and Training programs graduated 1,666 trainees during 1968-1969.

Five multiple centers for school dropouts were in operation which provided job-oriented basic education, orientation to the world of work, and occupational training. Job-oriented basic education was provided for school dropouts who had not completed the sixth grade and remedial education was provided for those functioning below the eighth grade. Guidance, counseling, and testing services were an integral part of each center.

In cooperation with the Norfolk City Schools, programs in five occupational areas were developed, funded, and put into operation as a part of the Norfolk Concentrated Employment Program. Orientation to the world of work, job-oriented basic and remedial education, and occupational training were made available for all disadvantaged persons who were referred.

Based on criteria from the U. S. Office of Education, four Manpower Training centers were officially designated Manpower Training Skill Centers and an additional center is being upgraded to qualify for official designation. These centers have their own identity, provide all services needed by the unemployed and underemployed youth and adults seeking employment, and have a permanency not experienced by present manpower training programs or centers.

Accomplishments

1. Ten project review and approval sessions were held in cooperation with the representatives of the Virginia Employment Commission; the Bureau of Employment Security, U. S. Department of Labor and the U. S. Office of Education, Department of Health, Education and Welfare.
2. Fifty-two planning conferences were held with representatives of local school boards and local employment office managers.
3. Cooperated with business and industry in planning training commensurate with their needs and the needs of available trainees.
4. Attended three regional conferences on Manpower Development and Training.
5. Presented the Manpower Training program at one vocational guidance institute.
6. Conducted three conferences and workshops for local Manpower Training supervisors.
7. Conducted a five-day inservice teacher training workshop for Manpower Training instructors.
8. Served as a Member of the Virginia Manpower Coordinating Committee working to coordinate the Manpower Services available through the various governmental agencies as set forth by the Cooperative Area Manpower Planning System (CAMPS).

SCHOOL FOOD SERVICE

The National School Lunch and the Child Nutrition Programs are designed to improve the nutrition of pupils in the public schools. This is accomplished by serving breakfast, lunch, and milk and assisting with necessary equipment purchases.

Pupils participating in the National School Lunch Program receive one-third of their daily nutrients. Supplementary nutrients are provided through the breakfast and milk programs funded by the Child Nutrition Act. To assist with these expanding programs essential equipment has been secured under this act.

During 1968-69 a special fund, known as Transfer Section 32, was made available for free and reduced-price breakfasts and lunches and nonfood assistance (equipment). This fund also enabled the State to appoint an additional professional staff member.

The food service programs are under the direction of the local school division with technical assistance given by the State staff. In 33 divisions there were 53 professional staff members serving as local supervisors. Total local expenditures for the operation of all programs was \$47,077,639.26 and reimbursement from federal funds amounted to \$8,415,248.64. Nine professional staff members supervise the State programs. The personnel assisted local divisions in the following manner: (a) planning food service operations; (b) administering and evaluating programs; (c) conducting workshops and conferences; (d) initiating study groups to improve standards of operation; (e) reviewing school building plans to determine the adequacy of food service facilities; (f) preparing and distributing new material and interpreting material previously distributed; (g) encouraging development of the educational aspects of the program; (h) and promoting membership in the professional school food service organizations.

An eight-member ad hoc committee on Nutritional Standards for School Lunch and Other Child Feeding Programs made a national study of child feeding programs and recommended ways to translate recent nutrition findings into practical recommendations on meal patterns. The staff has followed these recommendations in the expanding programs.

A uniform policy for determining free and reduced-price breakfasts and lunches was submitted to the State office by each local division. These policies were approved and an effort was made to assist the divisions in their effective use.

The supervisory personnel held 2,224 conferences with superintendents and other school administrators; visited 861 schools once and 87 schools more than once; and held 79 conferences with 2,731 school lunch personnel, teachers, and others. At seven regional three-day conferences the 526 persons enrolled had a choice of three classes per conference. State staff members also participated in many local workshops and a two-day conference was jointly sponsored by local and State supervisors.

National School Lunch Program

In the 1,763 schools approved for this program, a total number of 100,383,50. lunches were served, which represents an increase of 7,433,396 over 1967-68. The average number of pupils eating lunch daily was 574,660, an increase of 41,2970. This average represents 57 per cent of the average daily pupil attendance. A food reimbursement of \$5,928,207.58 was received by the schools.

Evaluations of lunch programs were made in 586 schools and performance surveys were made in 42 schools. These included: adequacy of the school lunch, participation, sanitation, records, and other phases of operation. The studies showed evidence of increased interest in reaching more pupils, better working skills, and improvement in the quality and nutritional requirements of the lunches served. Eight schools which have à la carte lunch programs receive no State assistance.

Special Milk Program

In the 1,801 schools approved for participation in the Special Milk Program, 1,763 schools served lunches and provided additional milk on which reimbursement was paid; 34 schools served milk only due to the lack of facilities, and milk was reimbursed in seven schools which, by choice, did not participate in the national school lunch program. Under this program 49,424,367 half pints of additional milk were served with a reimbursement of \$1,811,560.55 which enabled pupils to purchase milk at a reduced price. A total of \$49,807,867 half pints of milk was consumed by pupils in the public schools.

Breakfast Programs

Under the Child Nutrition Act of 1966, the 54 schools participating in the breakfast program served 885,910 breakfasts to pupils and received \$129,370.10 in reimbursements. The number of breakfast programs increased by 17 and average daily participation was 8,859, a daily increase of 4,689. This program has gained recognition for supplementing the nutrition requirements of the pupils. There are 30 additional breakfast programs operating with no State assistance.

Donated Foods

The national school lunch and breakfast programs received donated foods with a retail value of \$13,963,406.25 from the U. S. Department of Agriculture.

The State staff worked with local divisions on the proper storage and best use of these foods.

Nonfood Assistance

Nonfood assistance (equipment) was available from funds provided under the Child Nutrition Act and Transfer Section 32. The criteria for participation included schools whose cafeteria funds were insufficient to purchase needed equipment, schools with large increases in free and reduced-price lunches and breakfasts under the uniform policy, and schools with no food service programs. Local divisions were responsible for 25 percent of the purchase price and cost of installation of the equipment. The remaining 75 percent of the cost was paid from federal funds. A total of 264 schools in 82 divisions participated in this program with a reimbursement of \$549,970.85.

These purchases have provided the necessary equipment for schools to meet the needs of expanding breakfast and lunch programs and to initiate new programs. This has resulted in improved food standards, better service, and increased pupil participation.

Improvement of Space and Facilities

Thirty-four floor plans for new and remodeled kitchens have been reviewed. Emphasis has been placed on adequate specifications and recommendations were made to assure use of the most functional pieces of equipment.

TABLE 28—SUMMARY OF SCHOOL FOOD SERVICE PROGRAMS—1968-69

PROGRAMS	Number of Schools With Programs	AVERAGE NUMBER PUPILS SERVED DAILY			Total Meals Served	Reimbursement
		Free or Partially Paid	Paid	Total

VETERANS EDUCATION—1968-69

The State Department of Education is the approving agency for institutions and establishments desiring to provide education and training for eligible persons under the provisions of Title 38, United States Code. The eligible persons are veterans who may receive financial assistance under the provisions of the Veterans Readjustment Benefits Act of 1966, war orphans, and widows and dependents of seriously handicapped veterans.

The Committee on Veterans Education has established policies to be followed by the Executive Officer of the Committee in carrying out the provisions of the law in accordance with fundamental principles of education. The agency approves only such institutions and courses which will offer a sound program of education and training.

The following types of institutions are approved: Virginia institutions of higher education accredited by the State Board of Education; secondary schools accredited by the State Board of Education; public and private vocational schools; hospitals approved by the Council of Medical Education and Hospitals of The American Medical Association; and flight schools sponsored by the Federal Aviation Administration.

Private vocational schools meet approval requirements established by the Department's Division of Vocational Education and must have had at least two years' successful operation as a school within the State before approval can be given for veterans' training.

During the year the Committee received 210 applications for approval of courses from institutions in the State. They were handled as follows: 155 approvals, 50 disapprovals, and five not processed by July 1, 1969.

The following changes were made during the year in the number of approved institutions: 208 institutions approved as of July 1, 1968; 27 institutions approved during the year; and 228 institutions approved as of June 30, 1969. Approvals for seven institutions were withdrawn during the year.

Veterans Education

Staff members made 264 visits to public, non-profit, and proprietary institutions in the State. These visits were made to ensure that the requirements of the law were being met, to inspect for approval, and upon the request of the Veterans Administration.

The Committee received 280 applications from establishments requesting approval to train veterans on the job. Action was taken as follows: 245 approvals, 31 disapprovals, and four not processed by July 1, 1969.

The following changes were made during the year in the number of approved establishments: 152 approved as of July 1, 1968; 239 establishments approved during the year; 380 establishments approved as of June 30, 1969. Approvals for 11 establishments were withdrawn during the year.

There were 357 visits made to establishments to inspect for approval and to determine if the requirements of the law were being followed.

CONSTRUCTION OF VOCATIONAL FACILITIES

The first construction of vocational education facilities was started during the 1964-65 school year with funds available under the Vocational Education Act of 1963.

This Act describes an area vocational school as one which offers five or more occupational programs for full-time students. To be eligible for aid, a construction project must provide facilities for five or more occupational offerings which will be housed in one one school. Such a facility can be the vocational department of a comprehensive high school, a separate vocational education center serving the students from one or more high schools, or a school offering post-secondary vocational and technical training.

These vocational facilities should be available after school hours for classes for persons who have already entered the labor market and who need training or retraining to achieve stability or advancement in employment.

Also, these construction projects may include vocational facilities for youth who are potential dropouts and who are not able to compete in regular vocational programs on the junior and senior year levels.

National and local studies show that the majority of high school students enter the labor market when they leave high school as dropouts or as graduates. To be prepared to compete for available jobs, it is important that these young people have the opportunity to secure vocational training in high school.

The vocational staff assists local school administrators in planning job opportunity surveys and student interest surveys to secure information which is used to select the occupational training programs to be housed in a proposed building; assists in determining the space requirements for each training program; reviews the equipment arrangements that are developed by the architect; and cooperates with the School Buildings Service in evaluating the functional aspects of building plans and specifications.

During the 1968-69 school year the vocational staff assisted four counties in the Appalachian area in the planning of vocational buildings which were approved and funded under the Appalachian Act. These four projects are estimated to cost about \$2,450,000.

TABLE 29—VOCATIONAL EDUCATION CONSTRUCTION PROJECTS

1964-65-1968-69 Totals—39.....	13,854	1,353,364	20,480,565

DIVISION OF EDUCATIONAL RESEARCH AND STATISTICS

The activities of the Division of Educational Research and Statistics during 1968-69 are summarized below under the four functions of the Division.

Function 1: To Conduct Research Studies Requested by the State Board of Education and the State Superintendent of Public Instruction.

The following studies were in progress during the 1968-69 session:

Acceptable and Desirable Uses of the National Teacher Examination and Other Teacher Behavior Measurements in Virginia. This study, begun in 1967-68, is being continued. The teachers involved in the study were rated by their principals and supervisors in the spring of 1968 and again in the spring of 1969. The ratings obtained in the spring of 1969 are being analyzed in conjunction with several other measures that were obtained in the spring of 1968. A report on the first phase of the study is being prepared.

A Study of Educational and Occupational Aspirations of Virginia's 1966-67 High School Seniors. A final report on this study which was completed during 1968-69 was published and distributed to all school divisions, colleges, and universities in the State.

As a result of experience gained in the survey of 1966-67 high school seniors, the survey form was revised and field tested and will be used for a study of 1969-70 high school seniors. In addition, a follow-up study will be made of the 1966-67 seniors who continued their education.

Function 2: To Encourage and Assist School Divisions in Designing and Conducting Pilot Studies.

The 1968 General Assembly appropriated \$75,000 for each year of the 1968-70 biennium to aid localities in these studies. The purpose of State-level support for pilot studies is to encourage local school divisions to define their educational problems and to use new methods in solving the problems.

During the 1968-69 school year, 26 pilot studies were conducted in 27 school divisions. Sixteen of the studies were continued from the 1967-68 school year, and six will be continued through 1969-70. All proposals for pilot studies are reviewed by the research staff of this division and by specialists in respective problem areas. Proposals which are well-formulated and clearly defined and which have potential Statewide value are approved for funding.

Pilot Studies in progress during 1968-69 were:

- Focus on the Fundamentals of Mathematics (Albemarle County)
- A Program of In-Service Training for Mathematics Teachers New to the Arlington County Public Schools (Second Year of Study, Arlington County)
- An Organizational Pattern Allowing for Prescriptive Teaching with the Utilization of Paraprofessionals (Second Year of Study, Arlington County)
- Selected In-Service Experiences for a Limited Number of Experienced and Inexperienced English Teachers of the Arlington County Public Schools, Phase II (Second Year of Study, Arlington County)

- In-Service Education for Teachers Using Mobile Computer-Assisted Instruction (Carroll, Floyd, Grayson, and Wythe counties and Galax City)
- A Study of the Effectiveness of a Structured and Sequenced Program of Vocabulary Study in Improving the Reading, Writing, and Listening Skills and the Verbal Abilities of High School English Students (Third Year of Study, Chesapeake City)
- An Individualized Reading Program for Fifth-Grade Students (Chesterfield County)
- Project Va-Lead: An Instructional Program to Develop Values, Valuing, and Leadership (Second Year of Study, Fairfax County)
- Curriculum Revision with a New Approach to the Study of Government and English for Senior Students of Low Academic Achievement and Ability (Second Year of Study, Fairfax County)
- A Study to Test Improvement of Listening Skills and Vocabulary of Fifth-Grade Students Through Individual and Small Group Use of Multi-Media Materials (Second Year of Study, Hampton City)
- Development of Motor Skills in Mentally Retarded Children (Second Year of Study, Hampton City)
- A Comparative Study of the Value of Independent Skill Development Activities for Students Entering Junior High Reading Classes After the Beginning of the Course (Hampton City)
- A Non-Graded Multi-Grouped English Program for Eleventh- and Twelfth-Grade Students (Third Year of Study, Harrisonburg City)
- A Cooperative Team-Teaching Experiment Combining Remedial Mathematics and Remedial Reading Instruction for the Eighth-Grade Slow Learner (Second Year of Study, Henrico County)
- In-Service Education for Teachers Using Mobile Computer-Assisted Instruction (Lee, Dickenson, Wise, and Scott counties and Norton City)
- Modern Mathematics—Grades One and Two (Second Year of Study, Mecklenburg County)
- Science: A Process Approach—Grade Three (Mecklenburg County)
- A Study to Test the Experience Approach as a Means to Facilitate the Language Growth of "Language Deprived" Children (Montgomery County)
- An Investigation of an Instrument Designed to Predict Reading Failure of Pupils in Grade One (Second Year of Study, Newport News City)
- A Program for the Reluctant Learner with Emphasis on Reading (Second Year of Study, Prince William County)
- Movement Patterns of Early Childhood (Third Year of Study, Richmond City)
- The Use of Summaries to Publicize Educational Research Findings Among Teachers and Principals (Richmond City)

- A Vertical Long-Range Follow-Up Study of the Pupils Enrolled in the Model Kindergarten Project (Roanoke City)
- Introductory Physical Science Study for an Eighth-Grade Group of Slow Learners (Russell County)
- The Audio-Lingual Teaching of English to the Slow Twelfth-Grade Learner (Fourth Year of Study, Tazewell County)
- The Development of a Block Curriculum Program in History and English and a Comparison with an ETV and Departmentalized Approach at the Seventh- and Eighth-Grade Levels (Second Year of Study, York County)

Function 3: To Coordinate Educational Research in the State.

Extended School Year. Following the workshop held in August 1968, a 10-member committee representing nine school divisions met in November 1968, January 1969, and February 1969. At these meetings, sponsored by the Division of Educational Research and Statistics, new proposals for extended school year projects were presented and discussed. As an outgrowth of this planning, two pilot study proposals were developed, and have been approved for funding for 1968-69. The titles and respective school divisions of these studies are:

*Concurrent Planning-Operation of a Model Elementary School
Using Continuous Educational Programming, Richmond City Public Schools
Phase I of Continuous School Year Program, Norfolk City Public Schools.*

Conference on Educational Research. The Division of Educational Research and Statistics sponsored a one-day conference in Natural Bridge. Sixty-seven participants from several school divisions, colleges, and universities discussed the status of educational research in Virginia and laid plans for its improvement. Several staff members from the Department and several members of university faculties served as speakers and panelists. The educational research conference was one of the first efforts to establish a coordinated Statewide educational research community. As such, it laid the groundwork for continuing cooperation among the State's educational researchers in promoting innovations in research, development, and dissemination.

Pilot Studies. A pilot study—*In-Service Education for Teachers Using Mobile Computer-Assisted Instruction*—was conducted cooperatively by Lee, Dickenson, Wise, and Scott counties and the city of Norton. A similar project was conducted by Carroll, Floyd, Grayson, and Wythe counties and the city of Galax, making a total of 10 divisions involved in the study.

Analyses of two completed pilot studies were published during 1968-69. The titles and respective divisions were:

*The Effectiveness of the Use of Foreign Languages in Teaching Academic Subjects, Arlington and Fairfax counties and the cities of Alexandria and Richmond, September 1968.
A Study of Creativity Using Selected Sixth-Grade Groups, Henrico County Public Schools, October 1968.*

Pilot Studies Approved for State Aid in Public School Systems in Virginia 1968-69 was published in January 1969.

An article—*Study Being Given to Extended School Year*—was published in the fall 1968 issue of *Public Education in Virginia*.

Library Facilities. A complete microfiche library of all research reports published to date by the Educational Resources Information Center of the United States Department of Health, Education, and Welfare has been acquired by the Division of Educational Research and Statistics. These holdings as well as the others in the Division's library are available to all educational agencies in the State.

Regional Educational Laboratories. Staff members of the Division of Educational Research and Statistics represent the Department in three regional educational laboratories. They are the Central Atlantic Regional Educational Laboratory (CAREL), Appalachia Educational Laboratory (AEL), and the Regional Educational Laboratory for the Carolinas and Virginia (RELCV).

Function 4: To Provide a Two-Way Flow of Educational Data Between Local School Systems and the Department of Education.

Collection and exchange of information about educational programs conducted in the State is an important asset in providing quality education. Using machine data processing, information can be provided quickly and in enormous quantity and depth for use on State and local levels. Such data are valuable for use in policymaking, in interpreting the educational program to the public, and as a basis for educational research.

Educational data are collected by the Department from local school divisions through the fulfillment of regulatory obligations and through other service functions. Three prime goals under Function 4 are (1) to reduce duplicate requests for data, (2) to increase the use and analysis of available information for decision making, and (3) to increase services to local school divisions with a minimum increase in their own work load.

In the development and analysis of an educational information system the Division of Educational Research and Statistics concentrates on five sources of educational information. They are property accounting, financial accounting, personnel accounting, pupil accounting, and instructional programs accounting. Together these five areas make up an overall educational information system.

Each information area is a complement of the total system. Insofar as possible, it is necessary that each sub-system within the total system be capable of being integrated with any one or all of the other four sub-systems. For example, records on any individual teacher should include certificate information (personnel accounting), grade or subjects he is teaching (instructional programs accounting), the school to which he is assigned (property accounting), number of pupils he is teaching (pupil accounting), and financial information such as his salary (financial accounting).

Explicitly stated in Function 4 is the responsibility of returning information to the local school divisions. This is also a prime consideration of any new system design. The information returned to the divisions consists primarily of summaries and analyses of data that will be useful for decision making at the local level.

Examples of specific accomplishments under Function 4 are listed below:

1. The following applications either were put into operation during the 1968-69 school year or were carried over for completion from 1967-68: Triennial

School Census, Statistical Section of the Annual School Report, Non-Public School Identification, and Annual Instructional Media Report.

2. In cooperation with the other divisions and/or services of the Department of Education, systems planning activities were begun in the following areas to go into operation in fiscal year 1970 or fiscal year 1971: Automated Instructional Media System, Annual ETV Survey, Adult Basic Education, Preliminary Annual High School Report, Annual Elementary School Report, and School Lunch and Milk.
3. A detailed systems study of present and future computer needs was carried out during the past year. As a result, a computer of greater capabilities will be installed during fiscal year 1970. The new computer will increase the data processing capabilities of the Department both in the quantity of data that can be handled and in the quality of analysis of the data.
4. The analysis and dissemination of information in the form of summaries, analyses, and publications increased. Information was distributed to interested agencies at the local, State, and national levels and to the general public.

Examples of these include:

Statistical Data on Virginia's Public Schools
Dropout Report
Virginia School Census—1968
Enrollment Projections—1968-1983

5. Staff members played a major role in the development of an automated reporting system for the Southern Association of Colleges and Schools.

DIVISION OF TEACHER EDUCATION

Purpose and Scope

The Division of Teacher Education is responsible for administering the programs for teacher certification, approved programs in teacher preparation, State teaching scholarships, in-service education of teachers, the Education Professions Development Act (Subpart B-2), and scholarships for law enforcement officers. The following is a summary of the Division's responsibilities and activities during the 1968-69 fiscal year.

Certification of Teachers. Virginia statutes, like those in other states, require that legally employed teachers in the public schools hold certificates in accordance with "rules of certification" prescribed by the State Board of Education. These regulations are published in the bulletin, *Certification Regulations for Teachers and Qualifications for Administrative, Supervisory, and Related Instructional Positions, 1968*. Reports of Instructional Personnel, giving basic information for each regular teacher employed, are submitted to the division by the local school superintendents. The reports are examined to verify that each teacher employed holds the proper certification credentials. Master lists are prepared and used in the program of school accreditation.

Approved Programs in Teacher Preparation. In September, 1968, the State Board of Education adopted *Standards for Approval of Teacher Preparation Programs* in Virginia colleges and universities. The Department of Education was authorized, upon receipt of acceptable credentials, to issue a teaching certificate to a graduate who has completed a State Board approved teacher preparation program in a Virginia college.

The Department was also authorized to issue a regular Virginia certificate to a graduate of an out-of-state institution, provided the program completed by the applicant is approved by the State Board of Education and/or the Department of Education in the state in which the institution is located and it meets the minimum standards of the National Association of State Directors of Teacher Education and Certification.

During the year the Department, in cooperation with a teacher advisory committee, examined teacher preparation programs in the following institutions and recommended approval by the State Board, effective for the 1969-70 school session: Longwood College; Madison College; Old Dominion College; Radford College; University of Virginia; and Virginia State College.

State Teaching Scholarships. This program of scholarship aid, which is limited to \$350 per school year, is available to residents of the State who are preparing to teach or who need to improve their qualifications to teach in Virginia public schools. The scholarship aid which is in the form of loans, cancellable by teaching, may be used only in State-supported or private nonsectarian institutions of higher learning in Virginia.

During 1968-69, 5,906 Regular Term Scholarships were granted. In addition 769 Prorated Summer Quarter Scholarships were granted to prospective teachers who were working to obtain a degree in less than four years.

In-Service Education of Teachers. As a result of appropriations by the General Assembly, the State Board of Education has provided financial assistance to help teachers become more proficient in their teaching fields. These planned programs of in-service education for teachers constitute an important part of the effort to improve the quality of public education in the State. During 1968-69, 13,227 teachers were enrolled in: (1) specially designed extension courses offering college credit in their teaching subjects; (2) summer graduate courses offered at State colleges to give selected teachers the opportunity to keep up with developments in history, economics, government, English, foreign languages, guidance, mathematics, science, reading, or other subjects usually taught in the elementary schools; and (3) courses to qualify teachers to teach additional subjects in public schools.

Education Professions Development Act (Subpart B-2). This federal program, which became effective during 1968-69, is designed to attract and train teachers and teacher aides to fill areas of critical shortages in the public schools. Virginia's appropriation for Subpart B-2, the State Grant Program, for the 1969 fiscal year totaled \$319,962.

Project proposals, based on State EPDA Plan Guidelines, from approximately 20 school divisions were reviewed by a State Advisory Committee composed of division superintendents, representatives of the State Council of Higher Education, college personnel, and members of the staff of the Department of Education. Projects totaling \$294,341 were approved for operation during the summer of 1969 and the 1969-70 school year for the following school divisions:

Law Enforcement Scholarships. The General Assembly in 1966 passed an act which states that:

"Any law enforcement officer of the State, or of any county, city or town thereof who attends any college which offers a degree or associate degree in Law Enforcement, may, upon application and acceptance in such college in an accredited course toward such degree, apply to the Department of Education for Virginia for reimbursement of the tuition paid for such course. Upon such application, which shall be accompanied by evidence of the satisfactory completion of such course, the Council shall pay to such officer fifty per centum of the tuition cost of such course, not to exceed forty dollars for each such course. Upon receiving satisfactory evidence that such officer has continued to serve as a law enforcement officer for one year in Virginia following completion of such course, the Council shall pay to such officer the re-

maintaining fifty per centum of the cost of such tuition, not to exceed an additional amount of forty dollars for each such course."

To carry out the provisions of this act \$50,000 was appropriated for each year of the 1968-70 biennium. During the year ending June 30, 1969, first and second installments paid to eligible recipients totaled \$18,770.

Participants from the following localities were reimbursed for law enforcement courses completed: Alexandria (12), Arlington (41), Chesapeake (4), Chesterfield (2), Courtland (1), Fairfax (27), Fredericksburg (1), Hampton (32), Henrico (14), Herndon (1), Norfolk (17), Portsmouth (10), Richmond (103), Virginia Beach (6), Virginia State Police and Alcoholic Beverage Control Board (9).

EVALUATION AND PLANNING

The Special Assistant for Evaluation and Planning is responsible for studies of school building needs and comprehensive studies involving system-wide evaluation and planning.

Studies of school building needs are made at the request of division superintendents. These studies usually involve projection of school enrollment, assessment of the condition of school buildings, and recommendations concerning the need for new buildings and for additions and improvements to buildings. These studies are made by committees composed of Department staff members, division superintendents, and college personnel. Written reports of the studies are distributed to school boards to assist them in planning school building programs.

School plant studies were made during 1968-69 in the following school divisions: Buchanan, Clarke, Dickenson, Lee, Stafford, and Suffolk.

The systemwide evaluation and planning program which is designed to assist school divisions in identifying educational needs and formulating programs to meet these needs was begun during 1968-69 in 19 selected school systems: the counties of Bland, Buchanan, Carroll, Dickerson, Giles, Grayson, Lee, Patrick, Pulaski, Russell, Scott, Smyth, Tazewell, Washington, Wise, Wythe, and the cities of Bristol, Galax, and Norton.

The evaluation and planning studies, which will be extended to other school divisions in the State, involve the following steps:

Identification of Needs

An evaluation instrument was prepared by the State Department of Education to be used as a guide in identifying needs related to the local educational program staff, teaching aids and services, school plant, and pupil transportation. Identification of needs involves an in-depth study of the total school system, conducted cooperatively by the staffs of the Department of Education and the local school division. Five studies were completed during the year and evaluation reports describing needs in all aspects of the school program were prepared for the localities involved.

Classification of Needs

Needs are classified as either management or directional needs. Management needs are those which must be met to maintain the existing level of efficiency, such as painting school buildings on a regular schedule. Directional needs are those which must be met to develop a higher level of program effectiveness, such as increasing the academic achievement of pupils. In many school systems, a preoccupation with management needs leaves little time for directional needs.

Selection of Needs to Be Met

Ideally, it would be desirable to initiate programs to meet all needs immediately. In most cases, however, priorities must be set. Considerations involved in selecting needs to be met include the educational urgency of the need, available resources (in terms of personnel, facilities, materials, funds), and time.

Listing Alternative Ways to Meet Each Need

After determining which needs are to be met, every possible means should be considered to meet them. There are usually many ways to attain an objective. For example, if the school needs to establish a kindergarten program for five-year-old children, the possibilities might include: a summer program for all five-year-old children; a summer program for disadvantaged five-year-old children; a full-day program for all five-year-old children; a full-day program for disadvantaged five-year-old children; a one-semester program during the regular school year for half the children in the fall semester and half in the spring semester.

Although some of the alternatives may not be feasible, all five are possible. It is important to consider all alternatives before deciding upon a course of action.

Choosing Way(s) to Meet Each Need

In choosing the way(s) to meet each need, the following criteria should be applied to each alternative: relative effectiveness in meeting the identified need; preliminary cost estimate; personnel, facilities, and materials required; acceptability of the program to those who will receive it as well as conduct it; positive and negative effects on the total program; and continuation requirements.

Developing a Program to Meet Need

After way(s) to meet each need have been determined, a program must be developed to accomplish the desired objective. The following aspects of the program must be developed: objectives; program content (curriculum, pupil experiences); program requirements (staff, facilities, equipment, materials, cost); time schedule for implementing program; and provision for evaluation.

Implementing the Program

After the program has been developed, it should be presented to the school board and, if approved, should be adopted officially by the board as the first step in its implementation. Board adoption gives the program official status; the administration must carry out the approved program.

Brief descriptions of adopted programs should be kept in looseleaf notebooks for board members and other designated persons. The notebook can serve as a planning manual for the school system.

Evaluating the Program

School boards should review at least semi-annually each need selected and the programs that are being conducted to meet the needs. Administrative reviews should be more frequent and more thorough than those made by school boards. In these evaluations, it is not enough just to say that a particular program is "good," or that it is "liked" by many people. It is necessary to know precisely what is being done, why it is being done, what it is producing in measurable terms, and how much it costs. When this knowledge is available, it can be determined whether or not educational programs are meeting the needs of the community.

OFFICE OF THE SPECIAL ASSISTANT FOR FEDERAL PROGRAMS

The Special Assistant for Federal Programs administers the Elementary and Secondary Education Act of 1935 (Public Law 89-10) and Public Laws 874 and 815 which provide federal funds for school operation and construction, respectively, in federally impacted areas.

The organization for the administration of Title I of P. L. 89-10 includes a program director; a coordinator who is responsible for analyzing the educational soundness of applications for Title I projects and programs; four assistant supervisors with regional headquarters at Abingdon, Lynchburg, Warrenton, and Richmond, who assist in developing projects at the local level; an assistant supervisor whose principal responsibility is the evaluation of Title I projects; an educational grants advisor who reviews applications to make certain that they comply with the law, and with rules, regulations, and guidelines for administration of the program; an accountant; a key punch operator; and two secretaries.

The directors of the divisions in the State Department of Education aid the Special Assistant in the administration of Title V of P. L. 89-10. The Department's Division of Educational Research is the liaison agency for the Title IV programs, and the Library and Textbook Service is responsible for the detailed administration of Title II. Title III of P. L. 89-10 was administered by the coordinator for that program. Title VI-A provides funds to assist in the education of handicapped children. The Division of Elementary and Special Education is responsible for its detailed administration. A new program provided by the Education Professions Development Act, which is administered by the Division of Teacher Education, was begun during the year.

A summary of each of the programs follows:

TITLE I, P. L. 89-10

Title I provides funds for compensatory education for educationally disadvantaged children whose performance is not up to the level that is appropriate for their ages and grades. These children must be reached through "target schools" in which the percentage of children from low-income families (those with incomes of less than \$2,000 per year) exceeds the percentage for the county or city as a whole, or schools in which the number of children of low-income families is higher than the average number of such children per school in the county or city. Title I also provides funds for educational programs for children in State-supported schools for the handicapped, in State-supported institutions for the neglected and delinquent, and for the children of migrant agricultural workers.

Title I funds available to the State during 1968-69 totaled \$26,959,114 and included the following allocations:

For children in low-income families for 228 projects in 91 counties, six towns, and 34 cities.....	\$ 25,880,038
For children in State-supported schools for the handicapped..	473,671
For State-supported schools for the neglected and delinquent.	253,494
For grants to counties for the children of migrant agricultural workers.....	351,911

The Title I Program has supplemented and reinforced State and local educational programs in many ways. Emphasis has been placed on determining the needs of the educationally disadvantaged, training teachers to teach them, and

providing the media and environment to stimulate learning. The most frequent instructional activities were reading and language arts, physical education, cultural improvement, mathematics, art, music, and pre-school programs.

There has been a trend toward involving more pre-school and lower elementary grade children in Title I projects because evaluations indicate that greater benefits can be expected from educational programs at these levels.

Evaluation reports from school divisions indicate that substantial progress has been made in changing attitudes, improving attendance and accelerating learning by the disadvantaged child.

TITLE II, P. L. 89-10

Title II provides funds for textbooks, library books, audio-visual aids, and other instructional materials. An average of \$.9415 per pupil in average daily attendance during 1967-1968 in the public schools, plus the same amount per pupil in average daily attendance in eligible private schools, was made available to the public schools to be used to purchase library books and other instructional materials. This allocation was based on locally taxable wealth per pupil, books per pupil, and local expenditures per pupil for library resources.

The Title II State Plan gives local school divisions much latitude and responsibility for the selection of library materials, and also provides funds for the establishment of demonstration libraries.

Title II funds also may be used to purchase library resources for schools operated by State agencies that provide instruction at the elementary and secondary school levels. During 1968-69, eight schools operated by State agencies were allocated \$1,815 from this program and used \$1,420 of this sum. Pupils enrolled in eligible private schools may borrow library materials purchased with Title II funds. During the school year 36,068 pupils enrolled in 116 private schools located in 35 school divisions availed themselves of this opportunity. Virginia's total authorization for Title II funds during the year amounted to \$1,057,993, of which \$1,002,542 was allocated for 143 projects in eligible schools. Three additional demonstration libraries were established during the year with an allotment of \$166,000. The nine demonstration libraries established the previous year received special grants of \$4,000.

TITLE III, P. L. 89-10

Title III of P. L. 89-10 provides funds to localities for the purposes of developing exemplary education programs or demonstrating innovative approaches to education problems. Local education agencies submit project applications which are evaluated on a competitive basis. Cooperative planning by groups of local education agencies and participation of civic and cultural groups within the community are encouraged. During the 1968-69 school year, 36 projects were in operation. No new projects were funded during the year. More than 50 divisions with approximately 65 per cent of the State's average daily attendance participated in some way in Title III programs. Project activities included: in-service education for teachers; reading improvement; fine and performing arts; early childhood education; and diagnostic and corrective services for children with educationally handicapping conditions. More than \$3,000,000 was spent in Title III activities in Virginia during the year.

TITLE IV, P. L. 89-10

To some extent Title IV, which places major emphasis on the establishment of regional educational centers, is a revision of the 1954 Cooperative Research Act. The State Department of Education is affiliated with three regional research laboratories for which operational funds have been provided. They are: Appalachia Educational Laboratory, Inc., Charleston, West Virginia; Central Atlantic Regional Educational Laboratory, Washington, D. C., and the Regional Educational Laboratory for the Carolinas and Virginia, Durham, North Carolina.

TITLE V, P. L. 89-10

Title V provides funds for strengthening state departments of education. Under the program applications were approved for 40 professional and clerical positions, providing consultants for Department seminars and workshops, and purchasing educational and office equipment. Project applications approved by the U. S. Office of Education for the fiscal year totaled \$604,339. In accordance with the provisions of Section 503(14) of Title V, \$75,166 of this sum was granted to local educational agencies for 10 projects. These projects include various approaches to in-service teacher training, programs to meet special needs of certain pupils, and the aesthetic improvement of the school environment. As of June 30, \$478,557 had been spent from Section 503 funds and \$12,964 had been spent from Section 503(14) funds.

TITLE VI-A, P. L. 89-10

Virginia's allocation for projects financed from Title VI-A funds totaled \$660,289 and was used to finance teacher-training programs and summer projects in local school divisions and to pay the expense involved in the State administration of this Title. The teacher-training program consisted of a tuition reimbursement program, extension classes, and special study institutes. Twenty-one projects involving 38 school divisions were funded for the summer of 1969. These projects included educational activities and psychological diagnostic services for handicapped children; as well as projects designed to develop curriculum material and plan strategies for regional cooperative programs.

EDUCATION PROFESSIONS DEVELOPMENT ACT

A State plan was approved for Part B-2 of the Education Professions Development Act which is designed to attract and train teachers and teacher aides. The Division of Teacher Education is responsible for the administration of this Act which became operative in January 1969.

The appropriation for the 1969 fiscal year totaled \$319,962. Local school division projects costing \$294,341 were approved for the summer of 1969 and for the 1969-70 school year.

PUBLIC LAW 874

Public Law 874, originally enacted in 1950, provides funds for the operation of schools in counties and cities in federally impacted areas. To be eligible to receive these funds, federally connected pupils in a local school district must represent a minimum of three percent of the total average daily attendance for the district,

or 400 pupils. Funds are sent directly to the treasurers of the local school divisions, and are not distributed through the State Treasury. Fifty-nine counties, cities, and towns in Virginia received \$31,065,063 during 1968-69 under this law.

PUBLIC LAW 815

Enacted originally in 1950, Public Law 815 provides funds for school building construction in federally impacted areas. Administrative practices for this legislation are similar to those for P. L. 874, but additional emphasis is placed on a rapid increase in the number of federally connected pupils. Four counties and cities in Virginia received \$470,094 in P. L. 815 funds during 1968-69.
